Explaining Variations Over Time in Indicated Report and Indicated Victim Counts

Important legacy reports contain counts of indicated reports. Investigators ‘indicate’ reports (issue findings of abuse or neglect) when they substantiate the allegations contained in a report of abuse or neglect.

Investigations (reports) however can be retroactively unfounded (the finding of abuse or neglect is withdrawn). The two major contributors are sustained appeals of a finding of abuse or neglect and court mandated unfounding of the investigator’s findings.

Investigations whose findings are reversed (unfounded) on the basis of appeals are low in volume and rarely noticed in retroactive reports counting indicated reports. Appeals apply to just single indicated reports. The count of indicated reports for a certain time period run today or run 3 months from now will be the essentially the same data if only sustained appeals are involved.

However, indicated reports unfounded by court order can run in the thousands. The effect is noticeable. In this instance a court orders that a finding on a specific allegation type be reversed for all such allegations that occurred within a certain period.

Up to this point, mandated unfoundings on the basis of court orders has been limited to just allegation 60 – ‘Risk of Harm’. When that allegation is the only indicated allegation in the entire report, the entire report disappears from the count of indicated reports and is counted as unfounded.

Ashley M. and Julie Q. are the two class action suits leading to court orders to unfound indicated reports. During the periods covered by these reports all allegation 60 indicated findings are reversed (unfounded). Findings for allegation 60 for reports outside those periods remain unaffected.

The result is inconsistency in counts of indicated reports across time and inconsistency counting indicated reports within a period at two different times when these court orders are implemented. Trends can be established for total number of reports investigated and numbers of non-risk of harm allegations indicated, just not for indicated reports, for the affected allegation, or indicated victims if the only indicated allegation is that affected allegation.

History for Court Reversals of Indicated Findings	
Class Action Lawsuit	Period Affected
Julie Q.	October 1, 2001 – July 12, 2012
Ashley M.	July 13, 2012 – December 31, 2013
Ashley M.	May 31, 2014 – June 11, 2014

3. **INDICATED.** An investigation of suspected child abuse/neglect has revealed credible evidence that the abuse/neglect occurred.
