

INSTRUCTIONS FOR PETITION CIRCULATORS

Printing Petitions

Petitions must be printed on 8.5" x 11" letter size paper and printed on **BOTH** sides. One side will have blank spaces for the voter's signature, printed name, and address. The other side will have the printed text of the proposed amendment. The petitions that you download and print yourself **MUST** be printed or photocopied on both sides or the signatures you collect will not count!

We'd be happy to put you in touch with your regional field coordinator and supply you with petitions, please send us an email at info@MapAmendment.org. If you'll provide your name, mailing address and a phone number, we will send pre-printed petitions to you by mail.

Circulating Petitions: Who can circulate a petition?

U.S. citizens age 18 and over can circulate petitions.

Signing Petitions: Who can sign a petition?

Any Illinois registered voter is eligible to sign.

Tips for accurate collection of signatures:

Make sure that the people you sign up print their full address without abbreviations. The address they use should be where they are registered to vote.

What do I do when I'm finished circulating the petition?

You have the petition sheet notarized, with your signature. Your notarized signature at the bottom of each page you circulate is proof that you were the person who circulated them. Most banks provide notary service, free of charge. Take your petitions with you to your local bank or other notary public. Fill out the circulator's affidavit at the bottom of each sheet, and sign each sheet in front of the notary. The notary public will sign and stamp the petitions you have circulated.

Mail your notarized petitions to:
