

# Longwood Plantation

## Magnolia Place

Renee Bennett - Medication Technician

My name is Renee Bennett and I have worked at Longwood Plantation for seven years. I work with Dementia/Alzheimer's residents in the Magnolia building. We recently went through a class on Alzheimer's and Dementia and it was a great learning experience. We picked up several new skills to assist our residents. The most important thing when dealing with these residents is that we have to meet them where they are, and do our best to relate to them in their world. We have different activities for our residents, including physical exercises and cognitive and sensory activities as well. I have really enjoyed working in this field. I really enjoy socializing with our residents- visiting with them, making them laugh and helping take care of their daily needs.
