

This planting season, help keep our farmers safe.

SLOW IT SO THEY CAN GROW IT

- Studies have found that **82%** of farm equipment crashes involve a non-farm vehicle.
- Fatalities are **FIVE TIMES** more likely in accidents involving farm vehicles.
- Rural roads carry less than half of America's traffic yet they account for over half of the nation's vehicular deaths.
- **NEVER** pass a farm vehicle unless you are absolutely certain it is safe and legal to do so.
- **STAY BACK** at least two car-lengths so the operator can see you
- **SLOW DOWN!** We know going slow isn't ideal, but it could mean the difference in saving a life.
