Did you know?

Did you know that a fractured tooth may be completely painless, but cause very serious infection, bone loss and even the loss of the tooth?

It's true! Tiny cracks in a tooth are perfect routes for bacteria to get into the bone, where they multiply and erode bone tissue. If you notice a small bump in your gum, in the area of a tooth root, get it checked as early as possible! You may be saving your tooth and health.

We've come a long way! With excellent dental care from Dr. Strong, you will protect your teeth, look great, and feel even better. Dentistry with a difference!
