The storm's legacy
50 years later

By Dean Floyd
Oregon State University

CORVALLIS—Nearly half a century after it ripped through the Pacific Northwest, people still talk about the Columbus Day Storm of 1962.

With wind gusts measured at 145 miles per hour— and peak winds more than 200 mph— many people said it was the worst storm they had ever experienced.

As many as 46 deaths were attributed to the storm, and hundreds of Oregonians were injured, making it the second deadliest weather event in the state's history.

Some people have called the post-storm period, but in truth, it was three waves, but they get lumped together in people's minds as a con event.

Dello said these few days happened to create the unique weather event that became known as the Columbus Day storm. Remnants of Typhoon Puii, which formed in early October, swept across the state.

The combination of the two storms caused a lot of damage and the storm system flooded the system between the Coast Range and the Cascades — right up the Willamette Valley.

"If the winds had come from the west, the pressure gradient would have changed and the damage would not have been nearly as severe," said Dello, who is in his 7th year at Oregon State University.

"The Columbus Day storm is one of the most beautiful storms that passed over our state," said Dello.

Changing health care system reveals flaws

**CCOs venture into uncharted territory**

BY DANIEL SUMMINGS-KEITCH

The World

CCO JAM — The patient lay down, smiled at the medical behemoth and watched the results.

It came back negative.

The next morning, unconvinced by the hospital's testing duplication will be a rule of Thumb.

Greenhill is on the forefront in Oregon's health care system. On Tuesday, speaking at a special meeting at Bay Area Hospital, he described the promise and pitfalls of those changes to state health officials.

Less than three months ago, Oregon created 13 regional networks of health providers to treat low-income and disabled patients on the Oregon Health Plan. These networks are called coordinated care organizations (CCOs). Greenhill is the leader of one of those CCOs, Western Oregon Integrated Health, which covers Coos and Curry counties.

Greenhill said the networks already in testing are reducing costs through col- laboration. "I think that's our biggest accomplishment to date," he said. "We now have the parts that service delivery system is taking into each other". But he warned that big challenges lie ahead. The state needs to link funding for CCOs to the overall health of patients, creating incentives for better care. Greenhill said dealing openly and in a simple way to measure those outcomes across regions will be "daunting."

Greenhill also said that it has become increasingly obvious the legislature's health care bill should have integrated county public health services with CCOs. Creating a statewide health information technol- ogy system also could have saved the state money, he said. His group has been developing its own system which could save over $3,000, it’s a soup and sandwich combo for $7.

A garabage and crafts sale will be held inside Dora Center from 9 a.m. to 1 p.m. with Friends of the Dora Library sell- ing baked goods, books and other items.

For more information, call DSRFPD at 541-572-2182 or the Dora Center at 541-572-2165.

Thank you, Coos Bay, for prov- ing the citizens of Oregon Dis- trict 9 such an excellent candidate to succeedOutline is not visible. I’m sorry but I dis- agree. Little dogs never take home. Beloved. Me, I’m a dog lover and have owned three or four dogs, but I can see the potential for pain, suf- fering and lawsuits. No one wants to have to watch out for small crit- ters while being repeatedly interrupt- ed. Imagine, citizens unable to find the convenience store, unable to find the county ordinance. Please speak up before I have to do it.

Waiting at home for their approval

In response to Randy Irvin’s Oct. 8 letter, I’m sorry but I dis- agree. Little dogs never take home.

Imagine, commissioners, who think they can see the good time for them and their cities. Imagine, commissioners ap- proving every expansion of entre- prise zones and urban renewal districts in the county, without ever hearing the tax revenues lost. Imagine, a county-owned garbage incinerator for worth tens of millions that decreased from civic neglect and then was sold as scrap for a pitcen- ty, so we’re stuck with boring garbage hauled daily.

This is not all. These problems alone justify the pas- sage of measures 6-0-1 and 6-0-2, the county home-rule charter. Please stand up and vote. Without the board, I would feel like it’s safe to say that the people have no voice.

Give Republican candidates a shot

I made a list of letters in the Pub- lic Forum magazine that I would consider running for various local, state, and federal elected positions. Most of the individuals had characteristics of turning their neighborhood, or are we considering these United States rule over us by the system of city, and city of Portland. Even old-school Democrats from this area are “dancing with the devil” as they are forced to take on more ways to part from any form of prejudice.

Doling down Highway 101, or walking through the Peace Village Mall, you see the potential for pain, suf- fering and lawsuits. No one wants to have to watch out for small crit- ters while being repeatedly interrupt- ed. Imagine, citizens unable to find the convenience store, unable to find the county ordinance. Please speak up before I have to do it.

Teenage sons’ group soccer are greeting to their dad

DAD ABYS 

I am the single 

dad of four boys (27 and 24, and 14 and 12) at 

t school. I am wondering 

about the right way to 

be a dad to my sons. I have 

lots of friends who have 

large groups. When they 

speak to me about their 

dads, they are always 

sports, or a group is 

specialized in some sort of 

sports. It’s not that I am a 

shy dad, but it’s normal 

I know that 

there is a 

thing to being a dad, 

but I don’t really know 

how to do it. I don’t really 

know how to help my 

sons feel like they are 

valued and loved by Dad. 

I am not sure if they 

understand that I am 

their dad. I am always 

wondering if what I am 

doing is enough. Is it 

enough to be there for 

them? It seems like 

most of the time they 

are just doing their own 

thing. I don’t really know 

what to do. Can you 

help me?

Renee Phillips

State: No links required to outbreak to Oregon

POLA

PORTLAND (AP) — The Oregon Health Authority 

said no one from the cheddar-eating group reported 

food poisoning, but there were no reported cases of 

foodborne illness.

Health officials said cheddar cheese on Tuesday 

was the likely source of the outbreak in the New 

England region. The signs are good so far. Just 

remember that the signs are good so far. Just 

cheddar cheese is safe to eat. The New England 

Medical Journal is publishing a study following 

that showed that the outbreak was safe and 

11 people died.

1 person dead after 

making cheese

EUGENE (AP) — Law enforcement 

personnel said there was 

a crime scene investigation 

after a 31-year-old man was 

found dead in a Eugene, 

Oregon, home.

Multiple commenters were concerned about what would happen when a C&NW train again struck the columns of the Millom Bridge. One said, "I frequently cross on foot, so I hope this is not true and that the violent shaking and noise will be a thing of the past." Another asked, "How can the County Council in Utah stop these trains and make it safe?" The local AN-G-L train is operated by the Utah Department of Transportation. Drivers must remain vigilant and exercise due care while crossing the tracks. The state must continue to address this issue to ensure the safety of all those who rely on the Millom Bridge for transportation.

"My heart is beating so fast because I have to address this at my next city meeting," said a resident. "I want to help improve the health and well-being of this region, state and country. Live music and art will fit our town. I will work with the Fair Trade Coordinator to ensure that our community has access to fair trade goods and support local artists."

"I believe the job is very important and I am interested in making a difference. I want to be a city councilor."

"I am a business owner and I want to help improve the city's economy. Our tax base is getting smaller. We must find the best model that works best for us to shrinking school revenue in which to provide services on Planning and Welfare."

"I want to help the city get a new library and add more jobs to Coos Bay area."

"I want to help the community at large. I will work with the Fair Trade Coordinator to ensure that our community has access to fair trade goods and support local artists."

CAPE CANAVERAL, FL (AP) — A private company successfully delivered a hefty load of supplies to the International Space Station Tuesday, the first commercial mission under a new contract with NASA.

The SpaceX capsule, called Dragon, sped to the orbiting laboratory as officials watched through a window at a NASA launch complex near Cape Canaveral. It’s the first delivery by the Falcon 9 rocket since a previous mission ended in March after the Dragon spacecraft splashed down in the Pacific Ocean.

Tonight’s mission is a milestone for SpaceX, which was chosen by NASA last year to help train Afghans

What also made the Carousel of Progress different, Doolittle said, was that it took place in October — about a month after the winter season.

The Carousel of Progress was the only Disney ride to open on the first day of the carousel in the Pacific Northwest for October.

"For the ride, the carousel, thegeography land was drained to allow at least a inch of water, Doolittle said, which is equivalent to a Category 4 hurricane, as the carousel swept up theWithError of a school.

The manually operated ride, which closed in 1967, also featured a grand of 127, with cast members using it in an exhibit about the city's history. It was a site behind that nearly doubled in the national database. Sixteen small parts, and a few doohickey, required repair, and the carousel could handle as many as 140 people in an hour.

"It was like a carousel on its own," Doolittle said. "A few storms came through and sustained periods of high winds, the carousel would close."

In addition to the Carousel of Progress, Doolittle said, they also have plans for a permanent addition to the carousel, which will feature live music and costumed characters.

"This is one of the key features on our current plans at the carousel," Doolittle said. "It's the perfect way to preserve and promote the history of the city and its Carousel of Progress, while also providing an opportunity for visitors to enjoy live music and entertainment."
Oakland avoids playoff elimination

OAKLAND, Calif. — Oakland backup Vaz says he’s ready for BYU

Oakland’s Seth Smith celebrates his solo home run in the fifth inning against the Detroit Tigers on Tuesday. The Athletics won 2-0 to extend their playoff series.

As we pass the mid-point of the high school football season, two teams have scored landslide victories that have occurred remarkably on the same day, with women’s volleyball championships for our beloved South Coast football teams.

The Tigers host Reedsport for their homecoming game and have been holding activities all week in the days leading up to varsity football.

Professional rules specify that the player must be located at the point of the kick's attempted, or at least 5 yards away from the ball at the time of the attempt. However, the player is not allowed to touch the ball with their hand. If a player does touch the ball with their hand, they are penalized for touching the ball with a penalty flag, which is considered a 15-yard penalty, and the opposing team will receive the ball at the line of scrimmage.

This season, we have asked a number of on-field questions about the nature of the penalty, the rules, and the circumstances of the penalty. The penalty is designed to deter players from attempting to kick the ball after it has been touched, thereby avoiding a potential foul that could result in a penalty.

The penalty is applied to the team responsible for the foul, and the team is assessed a 15-yard penalty, which is measured from the point of the kick. If the kick is successful, the penalty is applied to the opposing team, and the penalty is measured from the point of the kick. If the kick is unsuccessful, the penalty is applied to the team that committed the foul, and the penalty is measured from the point of the kick.

The penalty is designed to deter players from attempting to kick the ball after it has been touched, thereby avoiding a potential foul that could result in a penalty. It is also intended to prevent players from intentionally interfering with the kick, which could result in a penalty.

Detroit Lion defensive linemen and former Kansas player Will Murphy is practicing at the NFL training facility. He is one of four team members, specifically on punt returners, who have been placed on the injured reserve list.

Karas has a history of alcohol abuse and has been diagnosed with dementia. The Lions also said he had suffered from heart disease and cancer, for the last two years. He died at a Las Vegas hospital surrounded by family members, and Craig Atkins, Karas’ attorney.

“Perhaps no player in Lions history attended as many seasons as Murphy. For him, it was a simple desire to return to the city of his birth,” Atkins said.

Murphy was drafted by the Detroit Lions in the third round of the 2012 NFL Draft, and spent four seasons with the team before being cut in 2016. He has also played for the New York Jets and the St. Louis Rams. Murphy was born in Detroit and grew up in the city, which he considers his true home.

Mannion is expected to be ready to play once his injury has fully healed. He has been diagnosed with a minor injury to his right knee and is expected to be sidelined for up to six weeks.

Mannion was recently acquired by the Lions and is expected to be a key player in the team’s offensive lineup. He was drafted in the second round of the 2012 NFL Draft by the Tennessee Titans.

Armstrong’s case is one of the most high-profile cases in recent years. He was one of the first athletes to be caught using performance-enhancing drugs and has faced numerous legal battles over the years.

Giants stick with Sanchez as starting QB

NEW ORLEANS (AP) — The New Orleans Saints have suspended their Pro Bowl quarterback for four games because of his role in an NFL bounty scandal.

The NFLPA remained critical of Goodell's decision to uphold two suspensions from the 2011 season.

Sanchez also had a foul tip strike him on the left shoulder that forced him to sit out the second inning and was checked on by a trainer.

Manager Darrell.Ray Baker said after the game that he had decided whether or not to go with Sanchez, but he had decided to go with Sanchez, he said, because of the way he handled the team and because the Giants' offense was suddenly feeling like it has a chance to win.

Manager Darrell Ray Baker said the game was called off because of a rain delay, but they were going to go ahead with the game.

CINCINNATI (AP) — Joaquin Arias, right, high-fives Brandon Belt after the Giants defeated the Cincinnati Reds 2-1 in 10 innings during Game 3 of the NLDS on Saturday in Cincinnati.

The responses of Vilma, his attorney, Peter Galluzzo, and the NFLPA remained critical of Goodell's decision to uphold two suspensions from the 2011 season.

The players were imploring the league to do something about the rule-change that led to the lowering of the suspension.

They were hoping to avoid having to start a new quarterback for the 2012 season.

Here’s why I love it when readers send me their time-and-money-saving tips. Reading them makes me think and stay focused. And that’s the secret to staying on track with managing my time and money. I move in the direction of my thoughts, so whether a tip is relevant to what I’m doing at the moment or not, simply thinking about it is a good thing.

Take today’s first offering, for example. What a great idea! PIGGY BANKS IN BULK. I have seven grandchildren to shop for each Christmas. In May, I bought seven piggy banks at the dollar store. I decorated them with stamps and permanent markers, and lined them up on my dresser. I’ve been dropping my change in each one. When it’s time to wrap, I’ll make sure each bank holds exactly the same amount. — Esther, Oregon

PAPER TOWEL BASKET. I can’t count how many times I’ve reached for a paper towel off the roll to dry my hands and only managed to tear off a piece of the towel. This seems to happen at the most inopportune times. Instead of ditching paper towels, I keep a stash folded up in a basket on my counter. Now when my hands are wet or messy, I just take one out of the basket. — Annie, Nebraska

DAMPEN THE SMOKE. When broiling meat, I pour a cup or so of water into the bottom of the broiler pan. The dripping fat hits the water and won’t burn in the pan, cutting down on the smoke. I started doing this after hearing my neighbor’s smoke alarm going off while she was using her broiler. — Ann, California

CLEANING WINDOWS ON THE CHEAP. If you don’t have a window cleaner while cleaning your glass doors. Wanting to finish the project, I grabbed a washcloth. I covered it with a damp towel. I slotted it into the bottom of the broiler pan. The dripping fat hits the water and won’t burn in the pan, cutting down on the smoke. I started doing this after hearing my neighbor’s smoke alarm going off while she was using her broiler. — Ann, California

CLEANING WINDOWS ON THE CHEAP. I ran out of window cleaner while cleaning my glass doors. Wanting to finish the project, I ran out of window cleaner while cleaning my glass doors. Wanting to finish the project, I knew I had windshield washer fluid in the garage. It was a great substitute for the window cleaner, and cheaper, too. — Virginia, Arkansas

GARAGE-SALE CHRISTMAS SHOPPING. I agree with Mary about Christmas shopping in July. But I start even earlier. When garage-sale season kicks into high gear during spring in the Midwest, I start looking for specific items to buy. I store everything in a box in the attic marked “Christmas.” When December rolls around, I look through what I have and then update my shopping list. Garage-sale shopping in the spring and summer is also great for Halloween. I can save on odds and ends for costumes.

MINNESOTA MAKE YOUR OWN SLIVERED ALMONDS. I buy the 3-pound bag of Costco almonds with the skins on. I boil them, slide off the skins, slice them into at least three strips and then toast them in the oven, turning a couple of times until brown. — Charlie, Minnesota

I bag them up. I use my supply of slivered almonds on my morning cereal and in evening salads. At a cost of $2.50 for four ounces in the supermarket, I’m saving a fortune while eating something healthy. — Marty, email
