## Did you know?

**Did you know** that sour candies erode tooth enamel and speed up decay?

**It's true!** Sour candies contain citric acid which erodes tooth enamel much faster than any other food. Most sour candies are more acidic than vinegar, and are in contact with teeth for prolonged periods as the candy is eaten. Rinsing after sour candy helps.

**We've come a long way!** With excellent dental care from Dr. Strong, you will protect your teeth, look great, and feel even better. With dental implants, you can now keep your smile for a lifetime! We enhance people's loves!
