Did you know?

Did you know that dental implants can help to strengthen bone and to save your existing teeth?

It's true! Dental implants exercise and strengthen bone which resorbs when teeth are lost. They also help distribute chewing forces, which reduces stress on existing teeth, and helps prevent damage to good teeth.

We've come a long way! With excellent dental care from Dr. Strong, you will protect your teeth, look great, and feel even better. With dental implants, you can now keep your smile for a lifetime! Dentistry with a difference!
