KIDTOWN

5/10

Birds and bugs can fly ... but there are also quite a few animals that you might not realize have the ability to become airborne. Among the creatures that possess the ability to glide over large distances are the colugo, or flying lemur, which can cover as much as 300 feet in one glide, and the flying squirrel, which can glide as far as 150 feet. The flying frog, the Draco lizard and the paradise tree snake have similar abilities. Flying fish can glide at speeds of over 35 mph above the ocean. The Japanese flying squid uses jet propulsion to leap as high as 10 feet above the surface.

TRUE but STRANGE

TAKING TO THE AIR!

By changing one letter in each row where indicated, change FLY to AIR. We've given you a clue to each word.

F	L	Y
A	I	R

Clues:

- Cunning or deceitful
- Utter words
- A method of doing something
- Armed conflict
- A great distance
- Evergreen tree popular at Christmas

Answers: SLY, SAY, WAW, WAR, FAR, FIR

Look through today's paper to see how many flying things or creatures you can find.
