KIDTOWN

2/1

If aliens in a distant galaxy somehow had the ability to view Earth through a giant telescope, they might assume that humans don't exist and our planet is solely inhabited by dinosaurs. That's because light travels at around 186,282 miles per second. A light-year is the distance light travels in one year. So if their galaxy were 65 million light years away, the aliens would be viewing light from Earth as it was 65 million years ago!

TRUE but
STRANGE

Here on Earth, the farthest distance from the continental USA is on the other side of the globe between Australia and Madagascar. Can you find anything about either of these countries in today's newspaper?

What's the farthest place from home to which you have ever been?

The following words all contain LIGHT. See if you can fill in the blanks from the meanings we have provided:

1: A tower to help ships navigate:

L**I****G****H****T**

2: Stage floor lights shielded from the audience:

L**I****G****H****T**

3: Illumination devices on the front of a car:

L**I****G****H****T**

4: The most enjoyable or memorable moment:

L**I****G****H****T**

5: Usually accompanied by thunder:

L**I****G****H****T**

6: Very pleased:

L**I****G****H****T**

7: The period between dawn and evening:

L**I****G****H****T**

8: An unfortunate situation:

L**I****G****H****T**

Answers: 1: LIGHTHOUSE 2: FOOTLIGHTS 3: HEADLIGHTS 4: DAYLIGHT 5: PLIGHT
