“Your good health depends on kidneys.”

“When your kidneys aren’t working well, your whole body suffers. You may notice swelling, your blood pressure may be difficult to control, and you may be overly fatigued. My job is to diagnose and treat your acute or chronic condition. Together we will manage your blood pressure, maintain healthy mineral levels, and reduce your inflammation, through an individualized treatment plan.”

Dr. Al Zein is accepting new patients at UPMC Cole. Call today at 814-260-5576.
