Meet Raven

Raven is described as having middle child syndrome, easily overlooked because he's such a well-behaved little boy. Must be true, as he's the last of his litter looking for a home! Raven has been raised in a loving foster home with dogs and young children, so he'd be a great fit into just about any home.

Raven is neutered, vaccinated, dewormed, flea treated, and microchipped! The full cost of his vetting will be about \$150; we simply ask that adopters cover as much of that as they'd like to. Please contact us and/or fill out an adoption application for Raven here: www.tiogacountycatproject.com/adoption

Help them get a second chance...

Winter Wellness: Has your pet had his/her preventive care exam (wellness exam) yet? Cold weather may worsen some medical conditions such as arthritis. Your pet should be examined by a veterinarian at least once a year, and it's as good a time as any to get him/her checked out to make sure (s)he is ready and as healthy as possible for cold weather.
