

NOTICE TO WESTFIELD BOROUGH WATER CUSTOMERS

Westfield Borough will begin flushing fire hydrants each Wednesday, starting May 6, 2020. You may notice discoloration in the water; this is because the pressure from flushing the hydrants causes a greater disturbance in the pipes than ordinary household pressure drawing on the lines. This should clear up within a few hours after flushing hydrants in your area. Flushing causes sediment to be flushed through the lines. You may wish to avoid doing laundry on Wednesdays.

Please note that hydrants are not flushed during drought warning situations.
