

A living donor saved Dave's life

David Kline

Living-donor liver
transplant recipient

"I don't remember what I said when they told me they found a match. I was just overcome. My family was struggling. Having a genetic disease that caused my liver failure, knowing the clock was ticking — we were anxious. When a hero stepped forward, donating part of their liver so that I could live, it meant everything. We are so grateful. Today I live a normal life because of that anonymous, selfless donor and the UPMC Living-Donor Liver Transplant Program."
