**Possibly Suicide**  
**Marilyn Monroe Found Dead At Her Home**

**Pill Bottle Beside Bed Is Clue**

**By BOB THOMAS**  
AP Movie-Television Writer

HOLLYWOOD, Aug. 5 (AP)— Glamorous and beautiful Marilyn Monroe, a glamorous star of the screen, died Saturday night.

Her body was found Sunday nude in a bed, a probable suicide. She was 36.

The long-troubled star clutched a sleeping tablet in one hand. An empty bottle that had held sleeping tablets was nearby.

Marilyn Monroe, fired from her last movie, had been in seclusion at her western-style rambling Spanish-style bungalow in Brentwood. At midnight, her housekeeper, Mrs. LaVerne Murray, found her in the actress' bedroom.

The light was still on at 3 a.m., and Mrs. Murray got no answer when she called to the door. She then called Dr. Hyman Engelberg. The latter pronounced her dead and summoned police at 4:20 a.m.

They told Police Sgt. Joseph Clemens that she was in bed nude, the covers pulled up to her neck. In one hand was a tablet. On the table next to the bed were numerous bottles, including an empty container of nembutal, a drug to induce sleep.

Police said no notes were found. A coroner's representative said an early investigation indicated suicide. Shown thereafter, the body was held, but County Coroner Theodore Curphy said results were inconclusive.

"We do know it was not a natural death," he said. "We further want to know what he made." He said it might take several days before it could be determined how she died.

**Junta Chief Speaks**  
**Honest Elections Pledged In Peru**

**By BOB THOMAS**  
AP Movie-Television Writer

WASHINGTON, Aug. 5 (AP)—The president of Peru's military government junta, Gen. Ricardo Perez Goyco, promised Sunday Peru's 1963 presidential elections will be absolutely impartial and that the winner will get the office.

The point was mentioned in news conference last Wednesday by President Kennedy at his residence. The junta would not be allowed to participate in Peru's elections next June 9 because the constitution of Peru forbids it.

The junta, he said, "complying with Peru's international obligations, is ready to take part in collective continental action against any form of Communist penetration." It seemed clear he meant that the junta would join the United States and other American republics in any new action against Communism in defense of "the principles and values of democracy."

Gen. Perez Goyco's comments in his speech were expressed in simple replies to questions submitted by Ben F. Myers, AP correspondent in Washington.

In addition to his comments on election plans, Perez Goyco pledged a clean government in Peru, operating on a balanced budget, announced the junta's government. U.S. officials expressed keen interest in the replies but with holdbacks, as the junta had been studied in detail. U.S. aid to Peru was cut off soon after.

Perez Goyco stressed that the junta is strongly anti-Communist, said the communist

**Psychiatrist Received Call From Marilyn**

**By BOB THOMAS**  
AP Movie-Television Writer

POINT ARGUELLO, Calif., Aug. 5 (AP)—Marilyn Monroe, no stranger to psychiatric treatment, called her psychiatrist Saturday morning.

Dr. Ralph Greenson, first police officer on the scene, added that Dr. Ralph Greenson had advised the glamorous movie queen to take a ride, to help her get better sleep.

"Dr. Greenson said Marilyn had called him about 5:15 p.m. and told him she was having trouble sleeping," Byron said.

Police estimated that Marilyn died shortly after she returned home from the beach.

The police were notified of her death at 4:20 a.m. by Dr. Hyman Engelberg. The doctor, a noted psychiatrist, said that she had died six to eight hours by that time.

Byron said Miss Monroe spent most of the day at home Saturday. The last person she spoke to was Mrs. LaVerne Murray, her housekeeper. Byron said Miss Monroe had told him that Marilyn talked about her morning.

**Politics In Arizona**  
Leaders Bolster Organizations

By LESTER N. INSKEEP

This is the vacation period, officials of both political parties are concentrating on persuading their organizations for the forthcoming primary election Sept. 11 and general election Nov. 6.

Neither will openly take sides in the various primary races, but there are some on which party officials individually are split.

On the state level are two Republican candidates for the U.S. Senatorial nomination who are probably the strongest. They are Stephen Shadegg, one time Democrat who had managed campaigns both for the veterans, Democratic Sen. Carl Hayden and Republican Sen. Barry Goldwater, and State Sen. Evan Mechem.

Although his political experience is limited to his single term in the state senate, Mechem is giving Shadegg some really stiff competition. This could be one of the closest races of the primary for the Democratic nomination for county attorney.

Most well-informed political observers hesitate to predict the outcome of either of these primaries. ★ ★ ★

In a letter to Democratic workers, the committee said:

"Traditionally, Democrats must rely on many small donations rather than a few large ones. Frankly, we like it this way. We are represented by a congressman who has received \$10 from each of 1,000 people, not a \$10,000 check from a big public utility or mining company."

Rep. Morris K. Udall of the 2nd congressional district already has asked his constituents to contribute \$3 from some 6,500 Democratic voters.

However, the Republicans say there's nothing new in seeking numerous small donations rather than a few large ones, and they too are contacting thousands of voters in search of \$1 to \$10 contributions.

G. W. Irvin, candidate for the Republican nomination for state representative in District 4, will speak to the Republican Club of Pima County at noon today in the Pioneer Hotel.

Also scheduled to speak at this meeting is Pat Henry, legislative candidate in District 11.

Henry will talk on the subject: "Why a Registered Engineer in the Legislature?"

**Tax Cuts By Jan. 1 Predicted**

WASHINGTON, Aug. 5 (AP)—Secretary of Commerce Luther H. Hodges predicted Sunday that "all us-corporations and individuals should be able to count on a tax cut effective not later than Jan. 1."

Interviewed on ABC-TV's "Issues and Answers," Hodges said he doubted there would be an immediate tax cut.

But in response to a question, he said, "If you didn't have a tax cut in the next few months, I think the President probably would stick to what he said. Mainly, that there will be a tax cut effective not later than Jan. 1."

As for the passage of what he termed a "meaningful" tax reform bill, Hodges asked that the people "keep in mind that these things do take a tremendous time."

Referring to the "slow process," Hodges added, "Now that may mean that the Congress may not get to it until next year, but we are working for this reform of the whole tax structure."

**Ferry Boat Capsizes**

TOKYO, Aug. 5 (AP)—A ferry boat capsized in Lake Kussharo, in northern Japan, killing 12 passengers, all of whom were missing, police reported.

The boat, yet to be acted on by the Senate, was originally sponsored by Sen. Estes Kefauver, D-Tenn. He says it was so watered down by the judiciary group that it now is a "sleeping pill." The forthcoming regulations will deal with handling of drugs during this period of experimentation.

The hope of the administration, however, is that the nationwide scare caused by thalidomide will spur congressional action on the proposed drug laws. The President has said stronger laws could prevent "even more serious disasters from occurring in the future."

Thalidomide, blamed for the deformities of thousands of babies overseas, never reached the American prescription market. However, it was widely distributed in this country on an experimental basis to test its effectiveness as a sleeping pill. The forthcoming regulations will deal with handling of drugs during this period of experimentation.

The hope of the administration, however, is that the nationwide scare caused by thalidomide will spur congressional action on the proposed drug laws. The President has said stronger laws could prevent "even more serious disasters from occurring in the future."

The proposals, substantially the same as those in a special message the President sent to Congress earlier this year, would enable the government to move faster to remove from the prescription market any new drug suspected of being a hazard to public health.
