**Subject:** Eric Coomer - Dominion and SOS Meeting 10/29/2019  
**Attachments:** Sect of State Equip Certification Advisory Committee Meeting 10-29-2019.pdf; Eric Coomer - Dominion - ANTIFA connection.pdf

Hi Karen -

**VERY IMPORTANT -**

**While searching the Internet, I came across a .pdf file of a meeting of the Secretary of State Equipment Certification Advisory Committee and Mr. Eric Coomer from Dominion Voting Systems dated October 29, 2019.**

**This is the very SAME Eric Coomer mentioned in the Press Conference yesterday held by Rudy Guilliani and Sidney Powell on behalf of President Trump.**

**This Eric Coomer is supposedly affiliated with ANTIFA and he's openly expressed hatred and bias against President Trump.**

---

**Please see the attached .pdf files and please share them with Governor Ducey.**

**It is now very obvious WHY Mr. Coomer sold this Dominion Voting System to Arizona in 2019. Reports state that it is a vulnerable system that can easily be manipulated and hacked with votes changed at will.**

**I highlighted the areas concerning Mr. Eric Coomer in the attached document.**

**Mr. Coomer's flagrant hatred of President Trump gives him motive to help manipulate the AZ election returns in favor of Joe Biden.**

**Karen, these machines should be examined by an independent forensic inspector as soon as possible to determine if they have been used to favor Biden over Trump.**

**The simple fact that Coomer was involved in placing this equipment in our State is very disturbing.**

---

**Karen - at least 50% of Arizona's citizens voted for President Trump and are very concerned that the election returns were tampered with.**

**I have lived in Arizona for over 42 years and I sincerely and respectfully request an investigation as soon as possible into Mr. Coomer's connection to Arizona and the decision to contract with Dominion in 2019.**

**Half of Arizona's great citizens are currently disenfranchised and lack trust in our State Government going forward.**

**Please help correct this.**

**Thank you for your time, Karen.  
God Bless You.**

**Kindest regards,  
Sue Ritchie**

**Please see attachments**

**Secretary of State Equipment Certification Advisory Committee**

(A.R.S. § 16-442)

1700 West Washington Street, 7<sup>th</sup> Floor  
Phoenix, Arizona 85007 & via Conference Call  
(602) 542-8683 fax (602) 542-6172

**FINAL UNAPPROVED COPY**  
**Meeting Minutes of October 29, 2019**

**I. Call to Order**

Chairman Janine Petty, Assistant State Election Director, Secretary of State's Office, called the meeting to order at 8:48 a.m.

**II. Welcome & Roll Call**

**Committee Members Present:**

Janine Petty - Chairman  
Peter Silverman, ESQ.  
Dr. Jim Helm

**Committee Staff Present:**

Chris Rhode – Elections Analyst & Staff  
Tanner Robinson – Elections Specialist & Staff  
Joseph LaRue – Assistant Attorney General  
Kara Karlson – Assistant Attorney General  
Caroline Shoemaker – Assistant Attorney General

**Committee Members Absent:**

None

**Committee Staff Absent:**

None

Chairman Petty began by introducing Election Systems & Software (ES&S) staff, who appeared via conference call, along with Dominion Voting Systems, Inc. staff present in-person, in addition to the committee and committee staff members present.

Chairman Petty introduced Mr. Peter Silverman, Attorney, Baskin Richards, who appeared and was present in-person, and Dr. Jim Helm, Information Technology Program Chair, Arizona State University, who was attending via conference call, who explained that his appearance on the call was as a result of a personal emergency that morning, stating he estimated he would appear in-

person at the Secretary of State's Office in an hour. Ms. Susan Paulson-Parmer, State Certification Manager, Election Systems & Software (ES&S), Mr. Steve Pearson, Senior Vice President of Certification, Election Systems & Software (ES&S), and Ms. Margaret Dos Santos, Account Manager, Election Systems & Software (ES&S), appeared via conference call, representing their vendor. Dominion Voting Systems, Inc. staff and committee staff announced their attendance in-person as well.

### **III. Status update, discussion and recommendations of Voting Equipment Application for Certification of the 6.0.4.0. Electronic Voting System from Election Systems & Software (ES&S)**

Mr. Pearson stated the Engineering Change Order (ECO) from the Election Assistance Commission (EAC) was not yet finished. He stated they feel confident of its approval. New policies and procedures were written for the EAC to assist with the update's approval. With EAC staff changes, he stated EAC staff were confident of the software ECO approval shortly. Mr. Pearson went on to say that while the ECO was not yet approved, they were going to proceed with federal lab approval simultaneously while seeking EAC approval. He stated he expected EAC approval by the late part of November.

Chairman Petty asked after the conditional certification request. Ms. Paulson-Parmer stated that the current version was desired for use in 2020. Mr. Pearson said the modification impacts no other aspects of the system other than the one line modification to ExpressVote firmware. He went on to say that conditional approval would allow moving forward for coding for upcoming elections. Chairman Petty reminded the committee that ES&S does have current EAC approval for 6040, but noted there was a question regarding Spanish languages which would be fixed via a software ECO change.

Dr. Helm asked what the line of code would do. Mr. Pearson said that if no selection was made by a voter, a "no selection" would be noted on a printout, without a Spanish translation. No selection would be noted with a modification, including a Spanish translation as well, on the same line, with the code. He went on to say that this would be ExpressVote changes only.

Chairman Petty said the application could be accepted, rejected, or approved with conditional certification noting that the ECO would need to be completed by a particular date.

Mr. Silverman said that he wished to go into executive session.

Mr. Silverman motioned that the committee exit regular session and enter executive session pursuant to A.R.S. § 38-431.03. Chairman Petty seconded the motion, and the motion was carried unanimously.

#### **Votes:**

Chairman Petty: Yes

Mr. Silverman: Yes

Dr. Helm: N/A

Ayes: 2  
Nays: 0  
N/A: 1

It was noted that Dr. Helm may have been dropped from the conference call. The call dropped, and did not allow Dr. Helm to submit his vote, to enter executive session. The motion was noted as "carried with a quorum".

Chairman Petty said the committee would be exiting the conference room in-person, noting that the conference call would be put on mute. The members moved to another location on-site at the Secretary of State's Office.

The committee exited regular session at 8:59 a.m.

The committee returned to regular session at 9:12 a.m.

Dr. Helm returned to the meeting via conference call at 9:12 am.

Chairman petty moved to recommend the certification of the 6.0.4.0. Electronic Voting System from Election Systems & Software (ES&S) with a conditional approval for the Spanish translation on the ExpressVote by 2021, noting that if the change is not received at that time, it would result in a de-certification, requesting that ES&S return noting the intention they would seek and show progress on their application for certification. Mr. Silverman seconded the motion, and the motion was carried unanimously.

**Votes:**

Chairman Petty: Yes  
Mr. Silverman: Yes  
Dr. Helm: Yes

Ayes: 3  
Nays: 0  
N/A: 0

Chairman Petty said that ES&S staff were welcome to exit the meeting and hang up from the call since their agenda item was now concluded. Ms. Paulson-Parmer requested after a written note of the conditional certification. Chairman Petty stated it could be done by next week potentially.

**IV. Approval of Minutes from August 15, 2019 Meeting**

Mr. Silverman motioned that the previous meeting minutes from August 15, 2019 be approved. Chairman Petty seconded the motion, and the motion was carried unanimously.

Votes:

Chairman Petty: Yes  
Mr. Silverman: Yes  
Dr. Helm: N/A

Ayes: 2  
Nays: 0  
N/A: 1

Dr. Helm rejoined the meeting via conference call. Ms. Kara Karlson, Assistant Attorney General, Attorney General's Office, stated that legal counsel recommended that the committee leave off Dr. Helm from the meeting via conference call until he arrived in-person at the Secretary of State's Office. Dr. Helm agreed, thanked the committee, and he disconnected from the call at 9:17 a.m.

**V. Review of Voting Equipment Application for Certification of the Democracy Suite 5.5-B Voting System from Dominion Voting Systems, Inc.**

Chairman Petty described the application from Dominion.

Mr. Waldeep Singh, Executive Vice-President of Sales, Dominion, introduced himself from Dominion. He introduced the central count solution, the HighPro high speed scanner. Chairman Petty sought clarification regarding which would be called which. Mr. Singh clarified that Initech HighPro would be its official name. Chairman Petty asked if the Dell was off the shelf, or whether it would need to be purchased from the vendor. Mr. Singh stated it would need to be purchased from the vendor, but that it was off the shelf.

Dominion staff noted that one station served as a work station, while the other served as a back-end station. Chairman Petty asked if the ballot box stacking equipment was included, and Mr. Singh noted that it was.

Chairman Petty said that the 10 minute presentation would be fine, and that the committee could pose questions if it had any.

Mr. Eric Coomer, Vice President, Dominion, introduced the equipment in his presentation, noting it was all off the shelf excluding the ballot box and image cast precinct tool. Chairman Petty asked after the UOCAVA portal. Mr. Coomer said that it was an included feature in the system, and noted that it was not included in the current certification. He stated that templates could be used in repetition per election, but noted that this did not have to be done, per the

Chairman's concerns. He noted that the full range of services were provided for the counties, adding that a training program is used for the larger counties. A full import capability could be done from project to project, he continued, answering the Chairman's concerns. Mr. Silverman asked if Dominion ever did PowerPoint presentations, and Mr. Coomer noted they wanted to show a more hands on demo. He went on, noting that the templates were keyword driven. The keywords are defined in the system, he noted for the Chairman. He continued, stating that an actual workflow is available. He said that it locks down certain parts of the system prior to continuing through election creation. Last minute definitions could be added for any contests that were not included, Mr. Coomer noted, addressing the Chairman's concerns.

Chairman Petty asked if the last minute definitions changed coding, and if so, noted that the Secretary of State's Office would need to do a logic and accuracy test again. Mr. Coomer said that it would only effect equipment for one district if issues occurred in that district. He went on to say that it knows how to process ballots, and that it would not out-stack. He clarified that a candidate who was not included on the ballot would be ignored and the rest of the contests would be counted, in terms of system capability. Mr. Coomer said that an easy backup process is stored on network storage, and it would be up to the jurisdiction to show how they wish to archive something. He said that splits could be done manually, and could be configured by party for primary elections, addressing the Chairman. She asked where the accessible devices would be noted. He answered, stating that the process is the same, and that specific templates would be used, and that it would be pulled and noted based off of the specific piece of equipment used, such as the ImageCast equipment. Chairman Petty questioned how the equipment would be programmed for specific election definitions on accessible equipment. Mr. Coomer responded, saying this is done via USB key, and noted that this is just one definition for all ballot styles in the election in this scenario. He continued, stating that USB keys would need to be designated by the users for specific definition usage. Election data is encrypted and password protected. For the ●  
● ImageCast, all access is granted through poll worker card. The technician card is used to load an ●  
● election, and the poll worker card is used to open the election. The password is generated by the ●  
● user, he continued. He went on to say that it is a pin digit access code with 6-12 numbers, answering Chairman Petty's questions. The precinct based tabulator used SD cards, and the ImageCast uses USB keys. The poll worker card can choose ballot codes, as a backup function. ImageCast voter activation is used for programming the voter cards, he indicated. Mr. Silverman asked about ballot casting capability at a one-time only basis, and the vendor confirmed this was possible.

Dr. Helm arrived in-person at the Secretary of State's Office conference room at 9:46 a.m.

- Chairman Petty described the thumb drive functionality for Dr. Helm, noting he could best understand it. Mr. Coomer described key exchange procedure. He stated it is dual authentication, addressing Dr. Helm. Mr. Coomer stated the password did not have to be the same for both card ●

- types, but it was recommended that they are not often differentiated. Chairman Petty asked how this would be configured for the precinct equipment. Mr. Coomer said that 3000 precincts could be used, and that the ImageCast equipment could be used for vote centers or precinct-based voting. The definition sticks are coded per the machine type, he continued.

Chairman Petty said the ballot numbers only go up to 200 on the application, and Mr. Coomer Clarified that this was an inaccurate within the current application, and that it could be set for 200000. He said that digital imaging is done automatically, and went on to say that image backups can be done via smart card, noting they could be programmed via USB key. Redundant images are stored on each card, and nothing was saved per device, only done specific to the smart cards, he continued.

Dr. Helm asked whether the smart card and key card would both be needed, and Mr. Coomer confirmed this. Mr. Silverman asked about the UOCAVA function and its connection to the internet. The Chairman stated it was not included in the current application, and Mr. Coomer noted this was an isolated function, for Mr. Silverman. Kristi Passarelli, Maricopa County Elections Department, noted that 503 polling places were used in the last election cycle. Dr. Helm said a 1 work station per 5 polling locations would likely be used in terms of an approximate estimation. Mr. Coomer said that audio clips could be done in the interface or via upload for the Native American languages, addressing the Chairman. Dr. Helm asked if both a button and SD card are used per station. Mr. Coomer said both would need to be programmed. Dr. Helm estimated it would be about 3 hours for Maricopa County to set up the work stations based on the setup parameters for the programming. Mr. Coomer continued, specifying that styling elements could all be controlled through the template process, answering the Chairman, noting it could also be shown on the accessible equipment. During ballot structure definition, contest rotation is an included step, and went on to say that ballot measure font color and additional parameters would also be generated here, per Chairman Petty's inquiry.

\* Mr. Coomer said that central count could be connected, and most of their customers use it this way, but it could also be done via USB key, as a part of an isolated closed network. Dr. Helm asked how electronic information is transferred. Mr. Coomer answered, saying that the results are uploaded from electronic data, and noted that audits are primarily at the discretion of each state. Dr. Helm went on to ask after election results uploads and audit procedure. Chairman Petty said this could be done if needed. Mr. Coomer said this is jurisdiction based. The central count could be configured for either a consolidated or precinct level report, one or the other. Once this is in the election management system, it could be displayed in any way desired, he continued, addressing the Chairman. \*

Mr. Ken Matta, Information Security Officer, Secretary of State's Office, announced himself, and requested to ask a question for Dominion staff via the committee Chair. Chairman Petty said

he could. Mr. Coomer spoke to the Chairman, responding to Mr. Matta's inquiry, stating that all precincts defined per machine would be printed, but it could be limited by definition, if only one or two precincts were needed to be printed. Mr. Matta thanked the Chair.

Dr. Helm asked how the smart card identifies the machine it is inserted to. Mr. Coomer answered, stating that encryption file elements are identified for each device by Election Management System (EMS) programming. It can be set up for individual devices, but it would not be recognized on another machine, since election signature matching would be required, he summarized.

#### VI. Presentation of the Script to be used for the test of the Democracy Suite 5.5-B Voting System Dominion

Chairman Petty said that primary election voting would be done for the accessible equipment, followed by optical scanning, and a similar process would be done for the general election, with zero tape generation being done beforehand.

Dominion staff noted that they currently had the general election loaded. Chairman Petty noted that the committee could test backwards.

#### VII. Conduct Test of the Democracy Suite 5.5-B Voting System

Chairman Petty requested zero tape generation before the test began.

Dominion staff noted that ballot stock was being used for ballot printout paper, and noted that black and white printout was used for the parties, addressing the Chairman. Chairman Petty asked if the voter would receive a paper printout from the equipment. Mr. Coomer confirmed this.

Chairman Petty wanted to confirm whether damaged or defective ballots would be out-stacked. Mr. Coomer said that out-stacking would only be done for double ballots, stating it would only come to a full stop during tabulation for damaged or defective ballots. Clear indication is on-screen, he continued, addressing Mr. Silverman and Ms. Karlson's concerns.

Chairman Petty asked after the access levels for the adjudication function. Mr. Coomer said there are two roles for adjudication. team logins. one login per team, in addition to administrative login, which displays batch management, and re-opening ballots. User labeling is done outside of the system. he went on. Chairman Petty asked if a log is kept prior to ballot commitment to the

results, and Mr. Coomer confirmed this. Chairman Petty requested this to be shown during the demo later on.

Chairman Petty asked whether the EMS could locate a write-in ballot. Mr. Coomer said that write-in ballots could be diverted into the write-in ballot bin, or later visually verified. Mr. Silverman asked whether this single machine was the only one staff could vote on. Dominion staff stated there would be two available for the primary election portion of the test.

Chairman Petty asked whether the ballot header and precinct name is customizable. Mr. Coomer confirmed this. Mr. Silverman asked whether the ballots could be fed in the equipment by any direction, and what the identification number signified. Mr. Coomer confirmed that it could be fed any way, and that the number signified the precinct identification due to the precinct splits. Chairman Petty asked if there is a timeout function configurable within the accessible equipment.

 Mr. Coomer answered that this was available. Chairman Petty asked whether any reboot button is anywhere on the equipment. Mr. Coomer stated this is not present.

Mr. Coomer asked whether any paper ballots would need to be added when the upload was happening. Chairman Petty stated that only the accessible votes would be uploaded for this portion of the test.

 Mr. Coomer said that during the tabulation process, the tabulation would stop completely if any errors or damaged ballots were detected, answering the Chairman's concerns. He continued, saying that any detected ballot errors could be rejected during the tabulation process if necessary. Dr. Helm asked what would happen when no write-ins were voted. Mr. Coomer responded, stating that the reports will show generic write-in ballots, not vote totals for the election report.

There was shown to be one inconsistency in the State Senate race.

The committee concluded that that the votes were accurately accounted for when viewing the precinct level report. The accessible portion of the general election test was shown to have been voted correctly.

Chairman Petty motioned that the committee recess for lunch. Mr. Silverman seconded the motion, and the motion was carried unanimously.

Votes:

Chairman Petty: Yes  
Mr. Silverman: Yes  
Dr. Helm: Yes

Ayes: 3  
Nays: 0  
N/A: 0

The committee recessed for lunch at 11:58 a.m.

The committee returned from the recess at 12:28 p.m.

The general election test continued with the optical scan portion of the equipment.

Dr. Helm left the Secretary of State's conference room to retrieve his cell phone at 12:42 p.m.

Dr. Helm returned to the room at 12:53 p.m.

\* Mr. Coomer stated that three batches had gone through adjudication. The reports could then be displayed in adjudication. Chairman Petty asked whether a report could not be run by team at this point. Mr. Coomer confirmed this could not. Ms. Sambo Dul, State Election Director, Secretary of State's Office, said that the draft procedures manual requires adjudication to be able to provide a printout of the adjudications made for the purposes of a verifiable paper audit trail.

\* Mr. Coomer said that the report could be printed per batch. Dominion staff noted they have been internally discussing displaying adjudication results reports station by station. Ms. Dul said that the county agreement described an activity report generation per station in order to show results in paper audit form for procedures manual implementation. Chairman Petty said that the issue would be what a team would verify against. Mr. Coomer said that an adjudication could be flagged for the administrator review. The activity log would still need to be printed, Ms. Dul said. Mr. Coomer said that adjudicated audit marks could be reviewed through the activity report with an additional access level. This could also be accomplished with a higher level login in terms of access. Mr. Coomer continued for the Chairman. He went on to say that the activity log could be compared to the audit log, addressing Ms. Dul. Chairman Petty asked whether this would be the only way to adjudicate, seeking clarification regarding whether there was no out-stacking for adjudication. Mr. Coomer confirmed this. He said that batch completion and a per user ballot adjudication is how the system has been configured for most of their accounts, but they have received questions regarding more strenuous and wider audit review.

\* The corporation commission contest was shown to have been placed with a discrepancy in regards to the adjudicated vote. Chairman Petty requested a precinct report for the corporation commission contest.

\* \* The votes for corporation commission were shown to be calculated incorrectly by hand count from the Secretary of State's Office's results, , but the voting equipment was shown to have tabulated the optical scan portion for the general election correctly.

The optical scan portion of the general election was shown to have concluded successfully.

The accessible portion of the primary election test began.

Ms. Dul asked how ballots can be read. Mr. Singh stated this could be done by the tabulator or on the back end, done via bar code. Chairman Petty asked whether language options would appear in the startup menu if additional languages were added for the accessible equipment. Mr. Singh confirmed that additional languages would appear in this menu. Mr. Coomer said that the cards could be configured to time out, along with the equipment, addressing the Chairman.

Dr. Helm asked if the instructions for the accessible equipment noted the differentiation between single touch and a double confirmation touch for ADA mode as opposed to regular mode. Mr. Coomer confirmed this.

Dr. Helm said he had an issue, and made a mistake, by taking out the voter card prior to getting a prompt for him to remove the card.

Ms. Karlson noted that she would be leaving the committee meeting for a doctor's appointment, and exited the meeting at 2:08 p.m.

No adjudications were done for the accessible portion of the test for the primary election.

Mr. Joseph LaRue, Assistant Attorney General, Attorney General's Office, interrupted the meeting and stated that the meeting agenda would need to be posted to the Secretary of State's Office's web site in order for the meeting to take place. It was their legal recommendation that the meeting be stopped, in order to determine what would need to be done going forward, and proposed a possible ratification scenario.

Mr. Chris Rhode, Elections Analyst, Secretary of State's Office, stated he would show Mr. LaRue where the meeting agenda was posted to the Secretary of State's Office's web site. Upon locating the agenda, Mr. LaRue said that it was his current belief that the meeting could continue, and left the meeting in order to consult additional Attorney General's Office staff for further clarification.

Mr. LaRue returned, and noted that since the agenda was published to the Secretary of State's Office's web site, it was his advice that the meeting could continue.

The meeting continued with the accessible portion of the primary election test.

One of the ballots was shown to have not been included with the tabulation results.

Upon re-tabulation, the accessible portion of the primary election was shown to have been tabulated correctly.

The optical scan portion of the primary election test began.

Mr. Singh asked how the Chairman would like to handle a ripped ballot. She requested that it be tabulated, and tabulation stopped on the ripped ballot accordingly. Dr. Helm asked if the tabulation would need to restart once the process stops for errors. Mr. Coomer stated that the process did not have to start from the beginning, and could continue.

Chairman Petty noted that the election results should show one more ballot than the predetermined results due to adjudication.

\* One ballot was marked with red ink, which was not detected with the adjudicator. \*

With this point in adjudication results in mind above, the results for the general election test using the optical scan equipment were shown to have tabulated correctly.

#### **VIII. Discussion & Recommendations Regarding the Certification of the Democracy Suite 5.5-B Voting System from Dominion Voting System, Inc.**

Mr. LaRue stated that the committee can recommend whatever it would like to, but noted that the Secretary's final decision may involve conditional certification. The issue is that the Secretary has submitted a draft procedures manual to the Attorney General and Governor, which authorizes adjudication, but the manual will only be effective in state election law if approved by the Governor.

Mr. Silverman asked what statute was being examined. Ms. Dul stated that there is no statutory reference, but that it is not authorized by the current procedures manual. Because manual adjudication cannot be done with this system, Ms. Dul stated that it would not be able to be conditionally approved.

Chairman Petty motioned that the committee exit regular session and enter into executive session pursuant to A.R.S. § 38-431.03. Dr. Helm seconded the motion, and the motion was carried unanimously.

**Votes:**

Chairman Petty: Yes  
Mr. Silverman: Yes  
Dr. Helm: Yes

Ayes: 3  
Nays: 0  
N/A: 0

The committee entered executive session at 3:01 p.m.

The committee returned from executive session and entered into regular session at 3:17 p.m.

Chairman Petty motioned for the recommendation of the Democracy Suite 5.5-B Voting System from Dominion Voting Systems, Inc., with conditional certification of the adjudication component dependent on the procedures manual draft approval. Mr. Silverman seconded the motion, and the motion was carried unanimously.

**Votes:**

Chairman Petty: Yes  
Mr. Silverman: Yes  
Dr. Helm: Yes

Ayes: 3  
Nays: 0  
N/A: 0

**IX. Discussion of Upcoming Meetings and Summary of Current Events by Chair Janine Petty**

The Chairman noted that no current meetings were scheduled at this time.

**X. Call to the Public – Please note: the committee may not discuss items that are not on the agenda. Comments are limited to 5 minutes per member of the public.**

The Chairman noted that no members of the public were present to comment.

**XI. Adjournment**

Chairman Petty motioned that the committee adjourn. Mr. Silverman seconded the motion, and the motion was carried unanimously.

**Votes:**

Chairman Petty: Yes

Mr. Silverman: Yes

Dr. Helm: Yes

Ayes: 3

Nays: 0

N/A: 0

The meeting was adjourned at 3:20 p.m.

*"Don't worry about the election, Trump's not gonna win. I made f\*\*king sure of that!"*

These were the words allegedly said by Dominion vote counting software chief programmer Eric Coomer to ANTIFA members and cell leaders on conference calls.

Once this revelation broke, Dominion scrubbed all of Coomer's ties with the company, but not before it's attempts were captured by eagle eyed netizens.

Among his academic credentials, Coomer holds a PhD in Nuclear Engineering, as well as 12 US patents, all of which are related to election software and voting machines. **At the time of this revelation, Coomer was a programmer who wrote the main code that is used in Dominion software supplied to all states that employed it to collect and count the ballots during the 2020 Presidential Elections.**

The revelations were unveiled when the chats between Coomer and his ANTIFA contacts had been intercepted by a data company employee named Joe Oltman, who had infiltrated ANTIFA and were able to capture their most confidential communications while posing as a supporter of the extremist group.

**Subject:** Election fraud

is when Donald Trump claims to have won despite losing both the EC and the popular vote by a landslide.

Stop fucking around. If you wanted election fraud evidence, you'd tell people to go to law enforcement or their county registrars. You're doing this because you want a one-party authoritarian state.

Too bad, losers.

Hi,

I just want to report that there's an Orange Piece Of Trash in the White House impersonating a President. He'd have to be the biggest fraud the World has ever seen.

Please take action.

Kind Regards,  
Deborah Collyer

**Subject:** Election fraud

I don't know of any **fraud** occurring during the 2020 election in Arizona **EXCEPT** by the **Republican-controlled legislature** and my own District 11 representative **Mark Finchem**. Fraud is a legal term. If it occurred, it should be proved in a court of law — which to date it has not.

Representative **Finchem** and **other Republicans** are attempting to steal this election by political and extra-legal means. If they are successful, they will have **stolen my vote**.

Even if the legislature is just collecting information by email, which is biased and legally dubious, and is not considering intervening in the certification process, it is still damning by casting dispersions on a well-run election.

Perhaps that is what the Arizona legislature should be examining.

Neil M. Ampel

**From:**  
**Sent:** Friday, November 20, 2020 7:19 AM  
**To:** 2020 Election  
**Subject:** Precinct-level voting pattern irregularities  
**Attachments:** Statistical Evidence of Potential Vote Switching in Maricopa County AZ.pdf

To whom it may concern,

Attached is an analysis that I performed on the Maricopa County voting data. I was curious about the voting patterns at the precinct level for other down ticket races by party. In this case, I used the state level senate races as a proxy. I found some very compelling results, enough that could possibly change the state-wide results of both the Presidential and U.S. Senate races.

For the past week, I have been working with Dr. Shiva Ayyadurai, who ran for U.S. Senate in Massachusetts this past year but did not make it past the primaries. After losing his primary, he was certain that there was something strange with the outcome, i.e. votes being moved from one candidate to the other. He is still following through with his case in the courts. I recently contacted him about his analysis of data in Michigan, where we found some very strange irregularities in the voting patterns there. I decided to take a look at the Maricopa County data, to see if anything stuck out. Attached to this email is a short report that I put together, but I can also supply a spreadsheet with the actual calculations. This was a fully objective analysis; it will stand up to any counter-party scrutiny.

I did my best to compile and explain my findings, but if it is confusing or too complicated, then I would be happy to elaborate. It may not seem like anything is strikingly out of the ordinary, but that is exactly how you hide something, i.e. by doing it in small amounts (2-4% on average) across many instances.

Kindest Regards,

Doug Applegate, PhD

## Statistical Evidence of Potential Vote-Switching in Maricopa County, AZ

In Maricopa County, Arizona, there is clear evidence of abnormalities when comparing Republican candidate vote counts to Democrat candidate vote counts in all the national level races, i.e. Presidential, U.S. Senate, U.S. House of Representatives. By looking at the voting patterns at the precinct level of state senate level races as a proxy, we will show evidence of how this was possibly performed. The data used in this analysis was obtained from the Maricopa County Elections Department website:

<https://recorder.maricopa.gov/electionresults/>, via the ArizonaExportByPrecinct\_110320.txt document:

[https://recorder.maricopa.gov/media/ArizonaExportByPrecinct\\_110320.txt](https://recorder.maricopa.gov/media/ArizonaExportByPrecinct_110320.txt)

First, let us present the state senate level races and their vote counts. There was a total of 20 State Senate races within the county. We will be looking at the vote counts for each of these races that were cast within Maricopa County (some senate districts do not fall entirely within the county, thus some votes for these senate races were cast in precincts in other counties not considered in this analysis). There were 6 races having essentially no contesting candidate from the other party. 4 of those no-contest races went to Republicans and 2 to Democrats. Table 1 below shows all the State Senate races with their vote counts cast in Maricopa County.

**Table 1**

<b>District</b>	<b>Republican(R)/Other(O)</b>	<b>Democrat(D)/Other(O)</b>
Dist-1	31,382(R)	12,953(D)
Dist-4	16,963(R)	13,463(D)
Dist-12	94,983(R)	59,422(D)
Dist-17	67,889(R)	61,363(D)
Dist-18	54,066(R)	75,013(D)
Dist-20	52,734(R)	48,059(D)
Dist-22	97,386(R)	55,653(D)
Dist-23	89,677(R)	62,115(D)
Dist-24	27,402(R)	66,719(D)
Dist-25	70,046(R)	44,443(D)
Dist-26	24,385(R)	49,806(D)
Dist-27	17,087(R)	57,027(D)
Dist-28	59,842(R)	60,339(D)
Dist-29	17,305(R)	41,272(D)
Dist-13	64,192(R)	3,994(O)
Dist-15	91,249(R)	10,178(O)
Dist-16	58,735(R)	7,892(O)
Dist-21	75,864(R)	3,182(O)
Dist-19	1,699(O)	53,794(D)
Dist-30	1,694(O)	42,344(D)
<b>All</b>	<b>1,014,580</b>	<b>829,031</b>

For the sake of this analysis, we are going to remove the no-contest races, and only focus on the contested races where there is both a Republican and a Democrat. Table 2 below reflects this update.

**Table 2**

District	Republican	Democrat
Dist-1	31,382	12,953
Dist-4	16,963	13,463
Dist-12	94,983	59,422
Dist-17	67,889	61,363
Dist-18	54,066	75,013
Dist-20	52,734	48,059
Dist-22	97,386	55,653
Dist-23	89,677	62,115
Dist-24	27,402	66,719
Dist-25	70,046	44,443
Dist-26	24,385	49,806
Dist-27	17,087	57,027
Dist-28	59,842	60,339
Dist-29	17,305	41,272
<b>All</b>	<b>721,147</b>	<b>707,647</b>

There is a total of 743 precincts in Maricopa County, removing the non-contested state senate race precincts leaves us with 547 precincts to analyze. There was a total of 2,036,439 votes cast between Trump and Biden overall. Within the reduced set of 547 precincts, a total of 1,484,697 (72.9%) of total votes cast in Maricopa County for President. The U.S. Senate and U.S. House vote counts are similar, yet there are more undervotes in those categories compared to the Presidential race (more on overvotes/undervotes later). Table 3 shows the total vote counts within the 547 precincts by contest type along with the corresponding percentages.

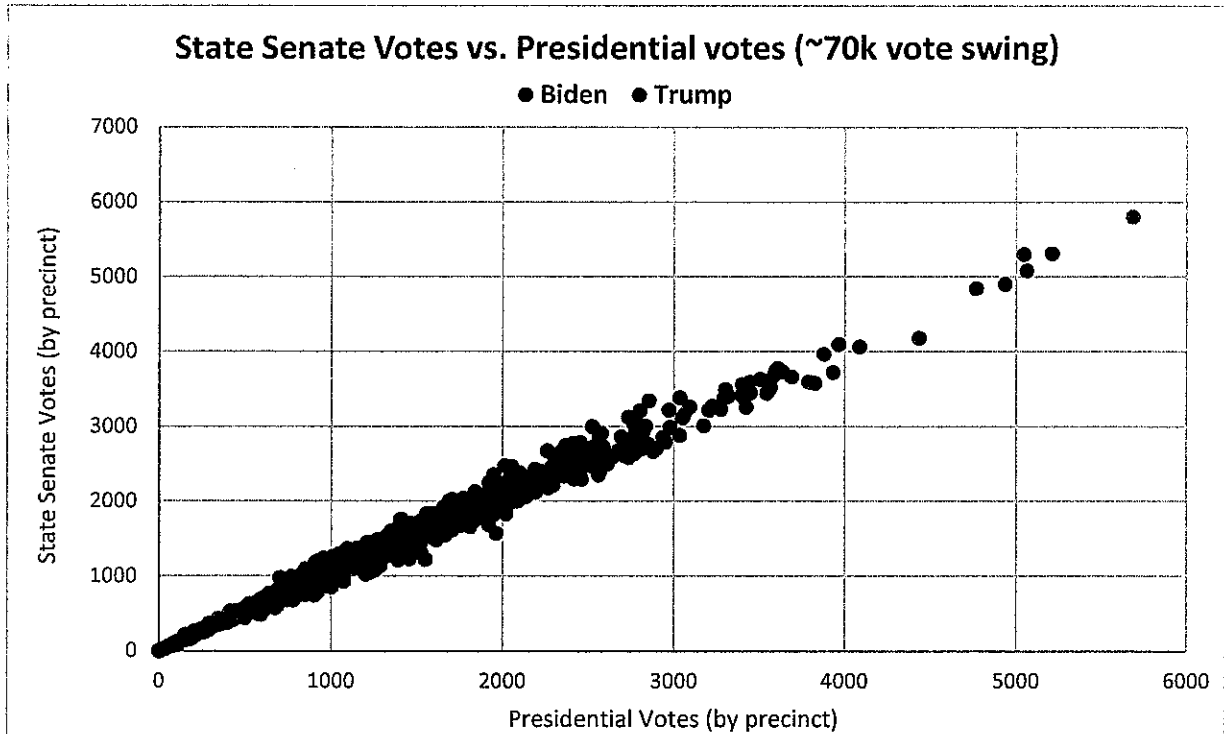

**Table 3**

Contest Type	Republican	Democrat
Presidential	713,749 (48.1%)	770,948 (51.9%)
U.S. Senate	708,988 (47.4%)	785,546 (52.6%)
U.S. House	705,555 (48.7%)	743,192 (51.3%)
State Senate	721,147 (50.5%)	707,647 (49.5%)

*The question now begs, "How does a party win more total votes among 14 state senate races, yet lose on total votes in races at the national level?" For example, in Precinct #646, Sunny High, there were 1,963 (49.3%) votes cast for the Republican state senator, and 2,015 (50.7%) for the Democrat senator. Yet for the Presidential Race, it was 1,572 (38.9%) for Trump to 2,473 (61.1%) for Biden, over 400 votes (10%) difference from the state senate vote counts. For the U.S. Senate race, it was 1,651 (40.3%) Republican to 2,441 (59.7%) Democrat.*

While this can certainly happen, the way this has occurred at the precinct level illustrates a very consistent and coordinated method of potentially switching small amounts of votes at each precinct. First, let us look at the Presidential race. Chart 1 below shows a scatter-plot of votes for state senate vs. votes for President for each precinct.

Chart 1

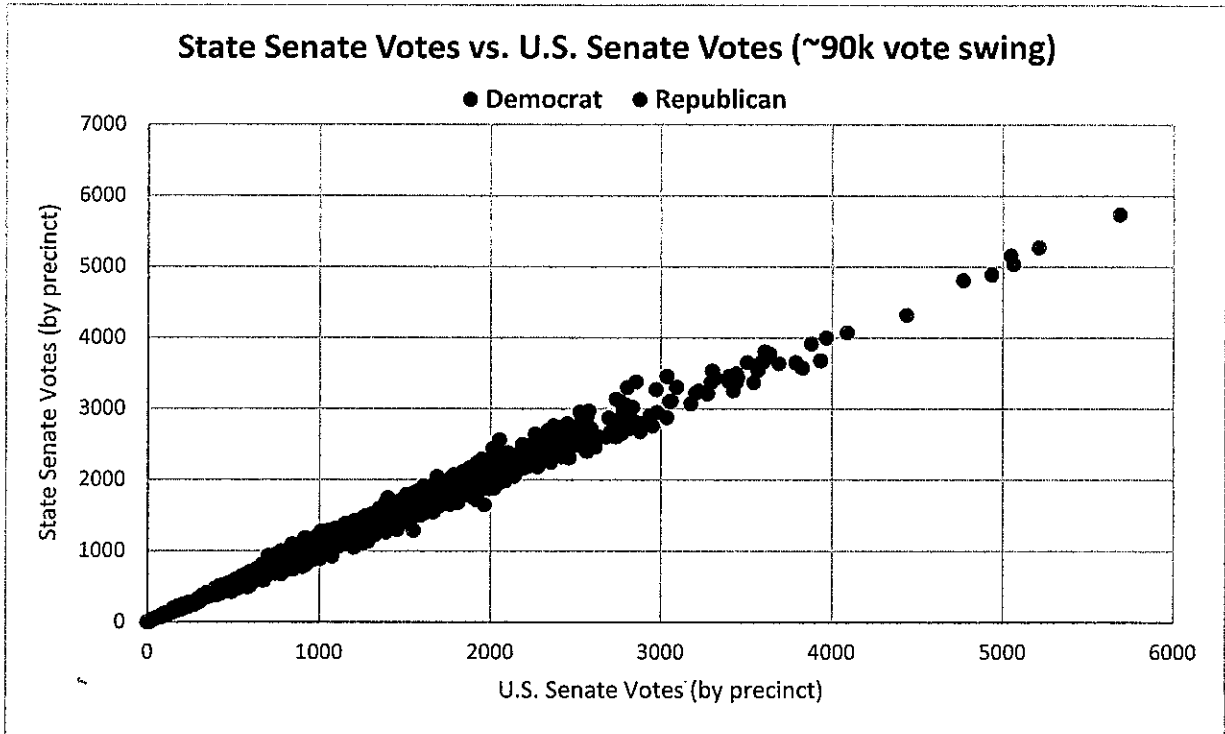

Each data point represents a comparison at a particular precinct. The x-axis is how many votes were cast for President and the y-axis is how many votes were cast for the State Senate of the same party in the same precinct. If a voter were to vote straight-ticket, then they would fall exactly on the line  $y = x$ . In general, the scatter-plot for both parties should be centered on the line  $y = x$ , and neither one should be favored over the other. As shown in the plot, there is clear evidence of Biden votes potentially being shaved consistently across many precincts, i.e. note the blue (Biden) datapoints higher with respect to the y-value than the orange (Trump) datapoints between 1000 and 3000.

Across all 547 precincts, there was an average of about 2.75% vote difference between the two races. About 85% of the time, this vote discrepancy favored Biden for a total of 38,044 votes. The other 15% favored Trump, with a total of 2,392 – a net difference of about 35,652 votes. If we were to adjust the results for each precinct to line up similarly with the state senate races of that precinct, it would result in about a 70k vote swing ( $35,652 \times 2$ ) back towards Trump.

Some might simply say that Arizonans simply rejected Trump and opted to vote for Biden. However, we will show that this behavior is also consistent in the U.S. Senate race as well as the U.S. House race precinct totals. Let us next look at the U.S. Senate race.

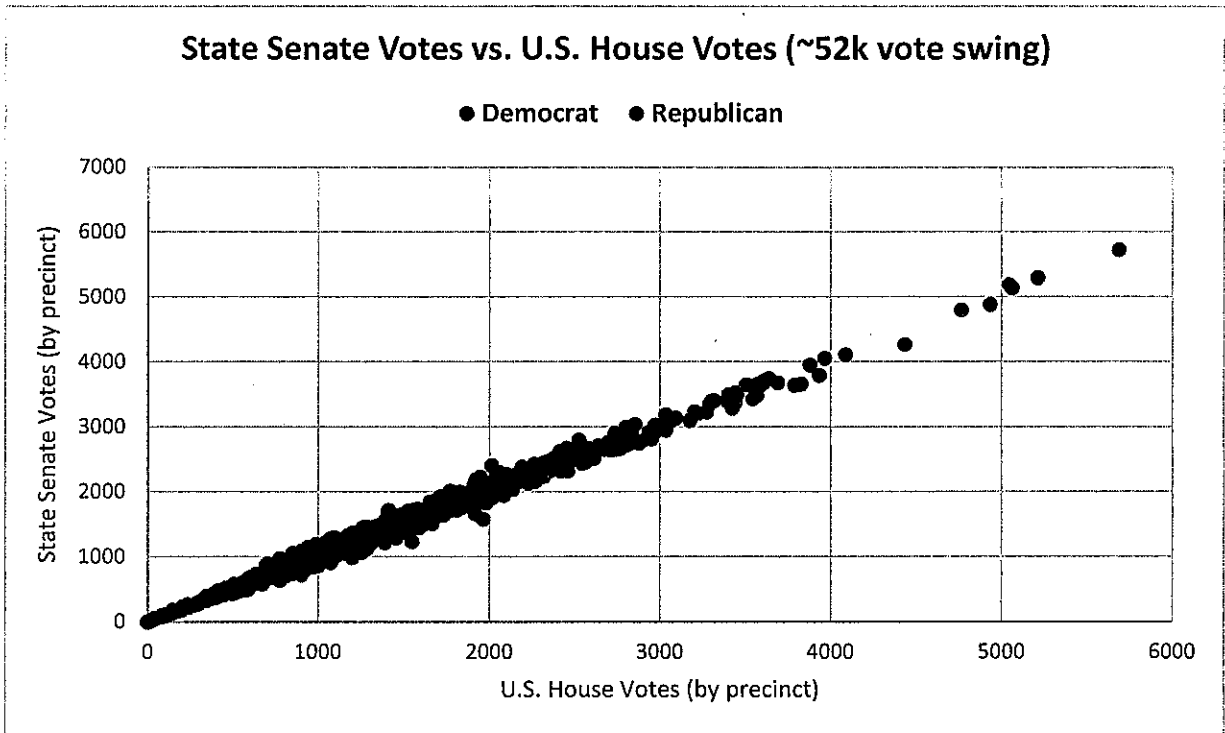

Chart 2

Like the Presidential race, there is collaborating evidence of potentially vote-shaving to favor the Democrat Senate candidate (Kelly) over the Republican candidate (McSally).

Across all 547 precincts, there was an average of about 3.15% vote difference between the two races. About 92% of the time, this vote discrepancy favored Kelly(D) for a total of 45,854 votes. The other 8% favored McSally(R), with a total of 695 – a net difference of about 45,159 votes. If we were to adjust the results for each precinct to line up similarly with the State Senate races, it would result in about a 90k vote swing ( $45,159 \times 2$ ) back towards McSally(R). Finally, let us look at the U.S. House races.

Chart 3

Similar to the Presidential and U.S. Senate races, there is evidence of potential vote-shaving favoring the Democrat House candidates over the Republican candidates. This is not broken down by each of the 9 U.S. House candidates, but is rather looking at the vote totals cast according to party. An analysis such as that would be a simple extension of this.

Across all 547 precincts, there was an average of about 2.05% vote difference between the two races. About 88% of the time, this vote discrepancy favored the Democrat candidate for a total of 26,810 votes. The other 12% favored the Republican candidate, with a total of 906 – a net difference of about 25,904 votes. If we were to adjust the results for each precinct to line up similarly with the State Senate races, it would result in about a 52k vote swing ( $25,904 \times 2$ ) back towards the Republican candidates.

The key finding in this analysis is that if changes were made, they were systematically applied in small amounts across the entire county, possibly by modifying certain settings within the electronic voting machines, or perhaps modifying the count elsewhere. It makes more sense now why the counting was shut down and halted for so long, time was needed to determine how to shave the necessary votes in multiple national level races without raising any large red flags. This analysis only accounts for about 73% of Maricopa County. Thus, the total amount of votes possibly switched in the county for the national races is potentially higher (~95k for President, ~123k for U.S. Senate, and ~71k for U.S. House)

Given that there is a consistent and identifiable skew towards the Democrat candidates in all the national races versus the State Senate races, there is more than enough reason to perform a full and proper audit, canvas and recount. The idea that voters would in concert vote for Republican senators at the state level, yet vote systematically differently in the national races, by just enough to win the entire race (certainly for Presidential and U.S. Senate) is egregious. A simple test of this would be to perform a full hand recount of a few select precincts, for example #646 (Sunny High), #245 (Fulton Ranch), #167

(DC Ranch), #506 (Pinnacle Peak), #728 (Wilder). These 5 precincts represent about 28k votes, less than 1% of all votes cast in the state.

It is also important to mention the undervote/overvote totals. Interpretation of these figures with reference to this entire analysis is up to the reader, but these numbers should be presented for the sake of completeness. Table 4 below contains the aggregate vote figures for each contest type.

**Table 4**

<b>Contest Type</b>	<b>Registered</b>	<b>Turnout</b>	<b>Overvotes</b>	<b>Undervotes</b>	<b>Republican</b>	<b>Democrat</b>
Presidential	1,871,178	1,523,638	3,204	6,428	713,749	770,948
U.S. Senate	1,871,178	1,523,638	307	25,530	708,988	785,546
U.S. House	1,871,178	1,523,638	267	72,681	705,555	743,192
State Senate	1,857,909	1,517,321	314	86,542	721,147	707,647

It is certainly a bit strange that the Registered and Turnout figures are higher for the national races. Furthermore, the increase in Undervotes as one goes from one level to the next is notably odd.

I am happy to provide a copy of my spreadsheets to anyone willing to confirm these figures, or just go to the source provided at the beginning of the document. I loaded the data into a database in order to assist in the compilation and querying process. Please feel free to offer a founded alternative explanation to what is provided.

**Sent:** Friday, November 20, 2020 8:08 AM  
**To:** 2020 Election  
**Subject:** Election fraud

When I went to a Pima County drop box location to drop off my ballot I witnessed clear election fraud. I pulled up curbside, and a man who appeared to be an election official approached my car and I lowered my window. He smiled at me-- that was weird, wasn't it? He didn't even know me, and he smiled. He was wearing rubber gloves on his hands, too. Why? These are serious questions deserving answers. Also, when I looked closely he appeared to have protuberances growing from either side on the back of his head. I asked him where he was from. He answered, "Not from around here." Then where was he from? With those antennae, he could have been from Mars. More serious questions deserving answers. Rudy Giuliani says the conspiracy reached only internationally on this planet, but I think it's much bigger than that. It's interplanetary. For all we know Martians are part of the conspiracy to steal the election from Donald Trump. Couldn't they? Serious questions deserving answers. Probably George Soros and Joe Biden travelled surreptitiously to Mars right after the 2016 election and recruited Martians and Martian technology to assist in stealing the 2020 election. They brought back Martians, and I saw one at the drop box where I turned in my ballot.

My contact information: I am usually a diffuse spirit and can be often found inside coral triangle crystal #34 near the top of Baboquivari Peak, but I astrally project myself intermittently throughout Arizona and parts beyond.

**Subject:** report election fraud

I want to report election fraud in Arizona. I remember trump telling us about it months ago, so it's obvious he can foretell the future. And now it's come to pass. There's no way that trump could have lost this election unless fraud was rampant in Arizona. Even giuliani says that fraud exists. Did you see how the sweat ran down the sides of his face during his news conference? It is obvious how much this is bothering him. And there are dead people voting. With more than 252,000 Americans now dead from coronavirus, it's evident that the democratic party is using the names of the deceased to gain more votes for their side. As this number increases, there will be more votes for trump's opponent. What has happened to this country? Please investigate.

Michael Carson

**Subject:** FRAUD

Hi, I'd like to report voter fraud in Arizona.

The Republican Party along with its leader Donald Trump are trying to contest election results and destabilize the already fragile extremely democracy in the nation. This is very dangerous. Please investigate.

I'd like to report as FRAUDULENT these actions inviting reports of fraud. Donald Trump has been talking about "rigged" elections long before the actual election, accidentally leaking that these kinds of after the fact shenanigans, calling into question the legitimacy of the vote, was always his plan and his intent.

I'd like to report as FRAUDULENT the hotline collecting examples of fraudulent voting, as this is in service to the fraudulent leader of the Republican Party who has the mental and emotional faculties of a toddler and cannot bear losing. I'd like to report as FRAUDULENT ALL the Republicans who put their fealty to this horrible pussy grabbing abusive mentally unstable emotional dictator, who has brought the nation down in the eyes of the entire world and in the eyes of well over half its citizens, to sub basement levels of vulgarity, stupidity, and corruption.

I'd like to report as FRAUDULENT all those who would jeopardize faith in our basic voting system in order to suck the toddler in chief's cock by spreading false rumors and conspiracies.

Please report immediately and investigate as all these actions of putting Donald Trump before country and Donald Trump before fundamental democratic norms of the United States constitute serious betrayal of the constitution to which elected officials such as yourselves have taken an oath.

Sincerely.

A very concerned citizen of the United States, who came here from an oppressive regime to escape just the kind of corruption, lying, cheating, fear mongering, conspiracy spreading, racism and frankly, rising fascist tyrannical mentality that I'm now seeing in the Republican Party.

**To:** 2020 Election  
**Subject:** Voter Fraud/Intimidation

Thank you for setting up this email account so that I can report some of the voter fraud and intimidation that I experienced.

My Trump Flag flying neighbor saw me drop my ballot into the mail and when he asked me if I voted for Trump and I said I didn't have to tell him, he said "we'll see if I can get that ballot out and find out"

Multiple friends were harassed while voting in person by Trump voters who were asking others in line who they were voting for and being very rude to anyone who believed other than them.

On Twitter, Reddit, and Facebook, local Trump supporters spread misinformation on the security of mailing in ballots as well as shared disinformation on how to vote. This is clear voter intimidation.

Post election, a bunch of MAGA folks made death threats against elected officials and volunteers.

The only voter fraud that took place was the fact that Republicans went out of their way to intimidate and spread misinformation because a dictatorship is more intriguing to them than a democracy.

Thanks for your time!  
-Jordan

**Subject:** Email Fraud

Dear Ms. Fann,

Thank you for setting up this voter fraud email account. I believe that nothing is more important in our democracy than secure, safe, complete, and accurate elections. It is with that in mind that I volunteered this year to work as a poll watcher for the two weeks of early voting and on Election Day. It meant long days on my part, with no pay or benefits. But it brought great gratification because I observed, at every early polling place I watched, a dedicated staff of professionals make sure that our election was legal and comprehensive. On Election Day, from 6:00 in the morning to 7:30 at night, I observe at a single polling site in central Tucson. I did not observe one example of a dead person voting, of a single person voting more than once, of an illegal immigrant who is not a citizen voting, of swarms of illegal voters being bussed in to the polling site, or of any other illegal or questionable activity. All I saw was citizens of this great country quietly doing their civic duty and poll workers efficiently and accurately facilitating that civic duty. All votes were counted; no illegal voting took place; no ballots were illegally moved or lost from the polling place; no election official attempted to change a voter's vote; no voter was intimidated away from the site; no campaigning occurred within the 75 foot limit; no single or groups of polling officials conspired in any way to affect the outcome of the election for any party.

Thank you for soliciting my observations.

**From:** Annette Sechrest  
**Sent:** Friday, November 20, 2020 10:47 AM  
**To:** 2020 Election  
**Subject:** Election Fraud 2020: What I Saw

To Whom It May Concern:

I volunteered for four 10+ hour days at two separate early balloting places in Tucson. I was outside poll observer and observed hundreds of people driving up to the ballot box staffed by two election officials. Usually, voters quickly deposited ballots waved and drove off. Some people actually went into the polling places to vote. As they were returning to their cars, I had an opportunity to ask if everything went ok. With the exception of fewer than a handful of voters (two of whom were registered in Pinal County), everyone voted. The election officials at both polling places were prepared, efficient, helpful and friendly. Voters were happy to fulfill their civic responsibilities and there were no problems. For four whole days!

On Election Day, I arrived at my assigned polling place, this time as inside observers, by 5:30 a.m. and stayed until after 7 p.m. Again, the election officials were fantastic. The voters were cheerful and friendly. Some even brought their children or grandchildren into the voting booth with them to show them how it worked.

I did not observe carloads of votes being removed from/ brought into the polling places or dumped in the desert. I did not observe carloads of votes being dumped at polling places. I did not observe illegal aliens trying to vote nor did I observe one person trying to vote more than once. I did not observe dead people trying to vote or anyone claiming to be a dead person trying to vote. I did not observe voter suppression, intimidation, or anyone trying to influence a voter inside or outside of the 75' limit. Everything went swell and I was really proud of Pima County Election Officials and Pima County Voters.

Thank you for giving me the opportunity to tell State officials what I saw!

I have one documented case of a voter casting a mail in ballot that showed up on the Pima County elections website that mysteriously was gone a week later. I can give you proof and more details upon your request.

The other issue has to do with same-day registration and voting which also happened in Pima County. If it is in fact your legal to register and then vote immediately after registering on the day before the election my wife and I both witnessed multiple occasions when that happened at the Pima County voting Center on the east side.

My name is Tim Wagner

**Subject:** Questionable vote tabulation  
**Attachments:** Potential fraud questions Election Eligibility and Ballot By Mail Status Check.docx

.On Nov. 2, 2020 I went to the web site provided to me on a paper flyer after I voted on October 30, I voted in person at the Broadway and Kolbe voting poll. When I input my information there was no record of my vote. I called the number for the Recorder's office and spoke with a woman called Diane. She said she would have to look into my request and get back with me.

After the election I went back to the site I was provided to see if my name would appear. The site stated I was mailed a ballot on Oct. 27, 2020 and was received at their office on the same day. My signature was verified on Oct. 29, 2020 and was add to the vote count on Oct.30, 2020.

Here the problems

1. I never received a ballot by mail.
- 2.I voted in person not by mail.
3. I need to know if someone else voted in my name.
4. I voted straight republican and need to know if that is how my voted was tabulated. I am willing to singed an affidavit backing my claim and so is my wife who drove me to the voting site and waiting for me in the truck until I returned. .
5. I have attached a copy of the screen shot from the Recorder's office and

**Subject:** Concerns about ballots I received by mail.

Good Morning

I would let you know that, I am legally here in US,Arizona since 2003. County superintendent and school district superintendent came to India to recruit Math teachers, that is how they brought me here. I am a green card holder. I am not a US citizen yet. I received 3 ballots by mail. I didn't know what to do with it so I put it in the trash.

I received a lot of text messages and phone calls asking me to help Biden win election. I used to hang up the phone, I told no. afterwards didn't receive any calls.

I never requested a ballot and not able to vote. why did I get 3 different ballots.

I am wondering if someone voted in my name.

I would let you know this happened with me.

Thank you so much.

God bless you all.

**From:** Sheila Gormley  
**Sent:** Friday, November 20, 2020 12:27 PM  
**To:** 2020 Election  
**Subject:** Election irregularities- I was a certified poll observer

Name: Sheila Gormley

Polling location address: Oct 28, 2020 Sun Lakes Methodist Church 9248 E. Riggs Road, Sun Lakes, AZ 85248 approx. time between 2pm -3:30pm

Polling location address: November 3rd, 2020 First Baptist Church Chandler 3405 S. Arizona Ave., Chandler AZ 85248 approx. time between 12:30 pm-5:30 pm

### 1. ALL PRINTERS THAT PRINTED BALLOTS WERE OFF FOR 2 HOURS-VOTERS TURNED AWAY

The IT person that arrived to repair the printers said that one needed attention, however, the IT person stated the other 2 printers were taken offline.

This Occurred November 3, 2020 at Polling location address: First Baptist Church Chandler 3405 S. Arizona Ave., Chandler AZ 85248 approx. time between 12:30 pm-5:30 pm

### 2. ONSITE OFFICIAL DEBORAH REQUESTED I OBSERVE BALLOT TABULATOR AND BALLOT BOX FROM OUTSIDE THE BUILDING, THROUGH TINTED WINDOWS IN 95 DEGREE HEAT.

Polling location address: November 3rd, 2020 First Baptist Church Chandler 3405 S. Arizona Ave., Chandler AZ 85248 approx. time between 12:30 pm-5:30 pm

### 3. POLL OBSERVERS BADGE IRREGULARITIES

I was a certified republican poll observer on Oct. 28th and on election day on Nov. 3rd. Both times there were "certified democrat" poll observers. On Oct. 28th this person had a blue shirt on that said "poll observer, have questions?" This person didn't have a badge on. I asked the official why this person didn't have an appropriate badge and she stated that the official earlier in the day ( according to this official, the morning official had been fired) probably checked his credential paperwork. However, this person was not asked to leave the building.

Additionally, on November 3rd, a "democrat observer" in the am didn't have a badge and was asked by one of the poll workers "where is your badge?" He replied he left in his wife's car. He was not asked to leave the building.

The afternoon, "democrat observer" didn't have a badge either. I asked the election official why this person didn't have a badge. She stated it wasn't her responsibility. She stated she viewed her credentials, however, this observer without a badge wasn't asked to leave the building.

There wasn't a sign in sheet for observers. Who were these observers? Were they actually certified? Why didn't the polling official ask them to leave the building without badges? All of these officials were feverently texting and one appeared to be taking pictures.

Why isn't there a sign in sheet for observers so they can be tracked if necessary? Officials need to make sure that observers have badges.

Thank you,  
Sheila Gormley

**Subject:** Election Fraud My Balls

To whom it may concern,

This is an embarrassment to my home state. Having lived here my entire life, I have finally grown sick and tired of the GOP in the AZ Legislature.

Karen Fann, you being the Senate President is a joke. Let us begin there. You are a simpleton from Prescott Valley who is better served remaining in that area. You bring ideologies that align with a fraction of this state - the rural portion that unfortunately is littered with radicals like yourself. Or in suburban areas like the Ugenti-Rita. You, incompetent people, are voted in by the public who cares little (unfortunately) about local elections - they see the party affiliation next to your name and they vote. The election was fair, BIDEN HAS WON.

You folks cannot handle losing and are an embarrassment to younger generations. It is unbelievable you folks get to call yourself "Senators" because I know the narcissism that exists within you, and this title is everything to you. It breaks my heart to see such disgrace hold such an honorable title.

I thank you very much for creating this email account and giving me a place to directly send a message and tell you guys how dumb most of you are. Remember, a small portion of you Legislators (DEM AND REP) have the actual intellectual capacity to legislate and be down there. And Karen Fann, I promise that intellect does not come from Prescott Valley.

Lay off the cigarettes, Karen. You look like gray leather.

**To:** 2020 Election  
**Subject:** 2020 Election

My name is Shannon Smith and I'm a registered voter in Pima County. I requested a mail in ballot this year due to covid 19 concerns but decided to turn it in at my polling place on election day due to concerns about election fraud.

I had a friend drive me in case there was a line, there was not. When I walked in, I asked the woman at the door if I could drop my mail in ballot and she said yes and directed me to a large box by the door and I put my ballot in. My identification was not requested and when I asked if it needed to be sealed in the envelope, she said no. She handed me a sticker and I left. I'm not sure if my vote was counted or rejected. It dawned on me later that my ID should have been checked. Please advise me what the next steps are.

Thank You,  
Shannon Smith

**To:** 2020 Election  
**Subject:** Potential Arizona Ballot Harvesting.

Dear Sir/Madam:

RE: Potential Arizona Ballot Harvesting.

My wife regularly visits her mother at The Beatitudes nursing home (Phoenix AZ). One day during the month of October, someone came to her mother's door and told them that they were here to take her, along with the other residents, down stairs to vote. They did not go, but we believe that it could possibly be ballot harvesting. I'd also bet that the individuals helping them through the voting process, also made sure that the ballots were delivered, rather than having the residents mail their own ballot. While we have no evident—we are certain, because we know that this is just the way things are done.

The Beatitudes has approximately 700 residents. Like most care facilities, resident's mental abilities vary widely. We know from experience that many residents do not have the mental ability to make their own decision for even the most basic of tasks and must rely on staffing Aids.

We also know the political view of several of the members in leadership and also the staffing aids. It is not a Trump friendly environment as evidenced by the Glendale Avenue marquee. For several months, until the election, the Glendale Avenue marquee included: "Black Lives Matter".

The Beatitudes  
1610 W. Glendale Ave.  
Phoenix, AZ 85021  
602-910-2795

To the best of our knowledge, Arizonans remain legally barred from taking someone else's ballot to the polls.

Regards,

JB Silvey

Dear Arizona Republican Legislatures,

I understand that you are collecting comments about Arizona citizens 2020 voting experience. I casted my ballot by mail and followed its course through the system via the internet. My vote was received and counted. Please stop discrediting the election and undoing our democracy. The only election fraud in Arizona is the despicable attempt by the Arizona Republican party and legislators to falsely discredit this election. What is happening in the White House and with some Republican Legislatures is simply shameful and beyond belief. What would John McCain say. Find some integrity and stop this nonsense.

This election turned out record number citizens who cast their votes in a legal and timely manner. It is time for all of us to accept that Joe Biden won this presidential election.

Respectfully,

Barbara Schrag

**Subject:** Voting Irregularities

Hi,

I would like to report some grow irregularities in the Arizona vote for President of the United States.

I find it highly irregular that anyone in state government would allow the rumors that there was voter fraud to given one iota of credence. It is absurd first of all. It is an attempt to undermine the system of democracy in this country. Any hint that the election may be overturned or somehow subverted should be investigated for treason.

I believe that actually setting up a superfluous email account to solicit accusations that undermine the election constitutes an act of treason. Why are you giving any of this air time? We all know there was no fraud. We know there was no fraud.

It is time for country over party! What would McCain have done?

Sincerely,  
Mike Kuliga

**Subject:** Shame on You

Dear Senate President Fann,

As I'm sure you yourself are not monitoring or addressing emails sent to this email address you provided to Arizonans, I can only assume my complaints will fall on deaf ears from one of your assistants or staffers.

Nevertheless, as a fellow Arizonan I feel obligated to write how incredibly disappointed I am in your recent conduct giving legitimacy to those who seek to defame and undermine our election. The people have made their voice clear, President Fann, and let me be clear when I say I have no doubt that you and your sad and pathetic attempts to try to cater to those who spew baseless lies about our election results without any facts or evidence will surely land you on the wrong side of history.

Members of your own party have repeatedly said Arizona's election was committed with complete fairness and transparency, with no indication whatsoever of any type of fraud. So what, I might ask, is the purpose of this email account you set up to address these continued baseless claims? After all, I do believe you know the elections took place without incident considering this same election has kept you in your powerful position as President of the Senate.

The answer seems to be that you refuse to denounce these outright conspiracy theories perpetuated by members of your caucus and party, and even seem to legitimize them with your words and actions, including setting up this email account to hear "fraud complaints." Shame on you Senator... You are a disgrace to the institution and state you serve, and your lack of leadership will not be forgotten.

While I have no quarrels with people disagreeing on policy or legislative matters (as is expected in a healthy democratic society), the line should be drawn when extremists (which is what they are, Senator) seek to completely overturn the will of the people. You may not like it but the people have spoken. Now I can only hope you muster up any ounce of courage and political leadership you have left and tell the people of Arizona what we all know to be true: this election was conducted fairly and accurately and **MUST BE RESPECTED**.

Until then, I will continue to inform our fellow Arizonans of the sorry excuse you pose as a political leader in our state, and will work to actually elect someone to your position who actually stands up for our democracy against those who seek to undermine it.

Sincerely,  
Ryan Tenty

**Subject:** Election Fraud

Ms Fann --

So you're looking for evidence of election fraud? It's easy to find. Just look in the mirror. If you want more evidence, look at your sidekick Mr. Finchem. The two of you are demonstrating clearly that there are no limits to your underhanded, perhaps illegal – certainly unethical and unfounded – efforts to overturn the clear will expressed by Arizona voters in an election that has produced absolutely no evidence of fraud on any level. Get over it.

You and your colleagues are doing great harm to the election process in Arizona by your efforts to undermine public confidence in the greatest pillar of democracy: free and fair elections. You should be ashamed of yourselves. The damage you are causing is the greatest election fraud impact imaginable.

It's obvious what your intentions are. Contrary to your likely belief, Arizona voters will remember your and your colleagues' clumsy attempts to steal this election and you will see their response in the next elections.

Richard Andrews

Senate Pres. Karen Fann

We are two voters who reside in Mesa Az in Maricopa Co. Timothy J Simpkins and Betty J Briscoe.

We both are on the permanent Absentee ballot list.

This year we decided to vote extra early in a polling place. We were told that we could fill out our ballots in the polling place but we had to use a sharpie they provided. It seemed strange since the ink bled through the other side of the ballots. We signed our envelopes, sealed them and placed them in the ballot box.

We have concern that our ballots might have been discarded due to use of sharpie ink.

Timothy J Simpkins

I want to report that I saw people going in and out of a church in my neighborhood that said, "vote here". I don't know if there were officials inside or if there were voting machines that were rigged in favor of the phony Joe Biden. It's entirely possible that no Republicans were going into that church that was called "polling station" but it's possible that none were. Also, for some reason, there were signs that said "100 ft limit". I don't know if that meant that supporters of President Trump could not come inside that limited area but it's possible that they could not. I hope this helps.

**Cc:** Sharon Joyce  
**Subject:** Election issues observed and reported to GOP from a poll watcher in maricopa county

I was a Republican credentialed poll watcher at a Estrella high school in goodyear. I was there on election day from 12:30 until 7 pm. I have submitted reports and affidavits to the GOP and information to the az attorney general office, but have not heard from either.

I witnessed multiple election irregularities. I will summarize them below. Please feel free to contact me for additional details.

They are:

1) i witnessed the "green button" issues numerous times throughout the day, where the green button was pushed in essence cancelling out some or all of the ballot.

2) the poll supervisor was adamant in trying to keep our representative from following the ballots (and presumably the memory drives) to the collection center. She kept informing us (me and our attorney) that we werent allow to have a representative follow the ballots and memory drive to establish a chain of custody.

3) over the course of the afternoon one of the printers kept printing ballots that the counting machine would not process. This would keep happening with the same people (republicans?) At the same printer and happened three times with each person until they were informed they had to cast a provisional ballot. Each person had to stand in line at each station (computer, printer, voting booth, counter) then be rejected, then stand in all lines again to enter info to get a ballot, get the ballot printed, then fill out the ballot, then stand in line a 4th time to have it counted). This increased the time it took to vote from 15 minutes to 1 to 1.5 hours.

i informed the supervisor that she needed to take that printer out of commission as its use was obstructing people from voting. She initially said she wasnt allowed, then after i insisted something had to be done, she eventually came to me and said a tech person would come to fix it in 30 minutes. They never came. This continued to happen for well over 50 voters, and could have happened even more earlier and later in the day. It is possible this was happening at ALL of the polling locations, and if the watcher wasnt really paying attention, may have resulted in many ballots not being completed. Even if the ballots were cast, they were cast as provisional, which created a situation where the ballots may not have been counted.

This report was filed with GOP HQ the night of the election, prior to the election results, as it was so greivous and obvious to me, i reported it even without having found out the count the next day.

i would appreciate being contact to provide more detail.

Sharon A. Joyce

**Sent:** Friday, November 20, 2020 3:52 PM  
**To:** 2020 Election  
**Subject:** Voting irregularities

First of all, there has been conflicting information on using sharpies to fill out ballots. Definitive information would be appreciated.

After checking on Maricopa County's website which specifically said sharpies were approved, my husband and I both used them at home to fill out our ballots. We have been on the early voting list for years.

My son, who is out of state for college, requested an absentee ballot. He filled it out (also with sharpie I believe, as I advised him) and then returned it to us via FedEx to insure it wasn't lost in the mail or delayed for any reason. He is a first time voter and wanted to be sure his vote would be counted!

I had called ahead of time (twice actually) just to be sure I was able to drop off his ballot, and to see what if any type of ID I might need to prove it was my son's and a legitimate ballot. I was told no problem as long as we are immediate family with matching permanent addresses. Twice I was given the same information so gave him the go ahead to FedEx.

Based on that information, I took all 3 sealed ballots to PV Mall, my husband's included. Upon arrival I was just instructed to drop them all in a collection box. No ID required. I even asked. No voters registration rolls checked, etc. This was unsettling (realistically I could have dropped off 20 I guess!) so I took pictures of each ballot front and back and planned to track them online. (I wasn't sure at that point what would be needed to do so). Eventually they all said received although my son's was one day later than ours.

Then I began hearing about the sharpie issue and wondered if our ballots were counted, tossed, etc but none of us ever received a call questioning anything. I do wish there was a way to know for sure that our votes not only were received, but were counted and were counted AS MARKED. If there is any way to do that, we would appreciate being informed.

We will be voting in person from now on only on Election Day to avoid the multiple issues exposed by this election.

Thank you for gathering/considering this information. Many voters are understandably concerned and will continue to be going forward.

Feel free to reach out in any way. Contact information to follow.

**To:** 2020 Election  
**Subject:** Open Letter

To those in charge of our elections, whatever your political affiliation may be:

I urge you to uphold the will of the people in this election.

This is not a political issue. This is a matter of life and death for our democracy. The world is watching, and so the potential repercussions extend even further than that. This concerns the stability of all democracy, of all free nations across the globe. You must not expose loopholes to subvert the will of the people, to uphold the party line.

It is my understanding that President Trump has been reaching out to some of you directly. I implore you to go public with whatever tactics he has used to try to manipulate you. If he has issued threats—veiled or not—the American people must know. Go to local news sources. Go to national news sources. Request anonymity if you need.

And no matter what, **stand firm**. Let history remember you for the right reasons. May you be remembered for standing up for your constituents, and not for being complicit in an attempted coup. Like our brave men and women in uniform, you are a public servant. You are a soldier for our democracy. You must fight for freedom and the will of the people. You cannot condone tyranny, or elitism, least of all from our nation's leader.

Continue to be transparent about the election, about the voting process and the safeguards that have been put in place to ensure an accurate count. Be transparent about discrepancies, prosecute anyone who has broken the law, but do not let that undermine our entire democratic process. Instead let it assure people that you have been careful.

I do not consider myself either Democrat or Republican. I am a proud citizen of Arizona, and a patriot, and I really do believe that our democracy is at stake. I hope we will one day abolish the Electoral College so that every American citizen has an equal voice. I respect the system that our founding fathers put in place, but the times have changed. Our world and our country are becoming ever smaller, and I believe it is time to reform our elections. The American people should not be put through this torturous process every four years.

I want to thank you for your service to our nation. And I urge you once more to do the right thing.

**Subject:** Maricopa county election fraud

Based on a reliable source and a photograph posted on line, I would like to report suspected fraud in the wake of the November 3rd election in Maricopa County. A woman named Linda Brinkman signed a "Certificate of Accuracy" of the GE 2020 Post-Test Combined Voting Equipment Test. With her signature she claims that she is the "Chairman of Maricopa County" which I understand is NOT her title. She also wrote "certification denied" despite the fact that she witnessed the test which showed zero errors between the hand count and the machine count. I would deem this to be fraud and hope the Arizona legislature investigates this person and comes up with the proper punitive measures for her actions.

Richard Bolton

**To:** 2020 Election  
**Subject:** sharpie

I voted at the PV mall location. I was in line at 5:30 am. The poll workers came out at 5:45 and said the machines were broken and advised people to go to the next nearest polling location. The alternative was to wait for the technician to come. I chose to wait. At 6am, they announced that the machines were now working.

I was given a sharpie to mark my ballot. The lady put it in the machine and it was rejected by the machine twice. Then she looked at my ballot (and saw who I voted for) and said "lets try this other machine". The other machine accepted the ballot.

I had a suspicious feeling about the whole thing.

Paul Roman

**Sent:** Friday, November 20, 2020 7:00 PM  
**To:** 2020 Election  
**Subject:** Election fraud

Hello,

I have a few encounters I want to report.

Sharpies should never be used on ballots. The system will reject it. How do we know the person even resanned it to make a copy or at that point just wrote copy on it and took an entirely new ballott and marked Biden. My daughter and her husband and grandparents all voted at roadrunner elementary school. They gave them sharpies. Thats what they were handing out. I cannot accept an excuse from anyone on this.

This email surfaced a few days ago from KELLY DIXON assistant director maricopa county elections. This proves this was intentional. I attached the email. She directed all depts to use ONLY BALL POINT PEN through nov. 2nd and directed them to switch to handing out ONLY SHARPIES on election day. Theres only one reason she would do this.

We know for a fact votes were flipped from Trump to Biden. I have a real time video from election night live on cnn where you can actually see trump loose votes and biden equally gain them in pennsylvania. We have overwhelming evidence of voter fraud across the states. An independant audit has to be done in AZ especially on the dominion voter machines.

I recieved 2 ballotts in the mail, figured it was some type of mistake. Until thousands of others reported the same thing. Recieving multiple ballots in the mail. Never requesting one and never signed up for absentee or mail in voting.

Please feel free to reach out if you have any questions.

Thank you,  
Lisa Jacob

**Subject:** I saw voter fraud in Tucson

Dear Senator Fann,

Thank you for establishing a place for law abiding citizens to report improprieties in Arizona's election process I went to vote in person at St. Thomas The Apostle Catholic Church at 5150 N Valley View Road in Tucson just before 7 pm when the polls were going to close. There was a short line, but all of a sudden a group of 12-15 people got in line behind me. They were talking loudly with each other, saying something about socialism and defund the police. There was something off about them and they talk among themselves in a language I never heard before.

I just mind my own business and showed my voter ID card to the election judge. The other guys came in too but show a voter ID card -- they said something to the judge and just help up their palms. I think their palms glowed a little bit when they showed it.

Afterward I decided to follow them. They all went off as a group and walked into a dark canyon in the desert. I didn't want to take a risk so I waited. A couple of minutes later there was a bright light that rose up straight up, and disappeared into the night sky. I think they was aliens that improperly voted for Biden. Please check this out and put your best investigators on it.

**Subject:** Maricopa County Voting - Queen Creek

Hello,

*My husband and I voted in-person in Queen Creek on Oct. 7, 2020.*

*We were told to use Sharpies even though I questioned it once it started bleeding through to the back. The ballot was a mess.*

*Once we were done with our ballot, we put it in an envelope and placed it in a slot in a box as instructed. The whole process seemed very unofficial.*

*I did not feel right about the whole incident.*

*I heard some people put their ballot in a machine at other locations and it was validated or not. We did not have any machines. Just a slot in a box.*

*Also, I thought we needed 2 forms of ID. When we first got there, I immediately took our my drivers license and started looking for my voter registration card and she told me no that's fine its not needed. I was prepared to give her 2 forms of ID but she said not needed. It struck me as lax and unofficial.*

*We also had about 10 Trump signs in our East Mesa neighborhood. And we saw Trump signs on the way to the Queen Creek voting area. I personally felt we were in a strong Trump area. I was shocked that Maricopa went red first time for several years.*

*And one more thing, one week after we voted my husband and I both received mail in ballots. We also received text messages and mail saying public records show you have not voted yet, please vote.*

*I do not feel like my vote or my husbands counted at all.*

*I also do not trust the website saying my signature was verified and my ballot "counted". I believe that yes my signature was verified since I did in-person voting, but i feel that either my ballot was not valid or it went to the other candidate. I think my envelope may have been "counted" but not my ballot.*

*I emailed and called and left messages with several people. The people I did get a hold of, talking with them did not feel right. I was told something that seemed strange. in one case .... And in another case a person who answered the phone in republican offices actually mentioned negative comments about Trump, which was odd to me and again felt off.*

*Please feel free to contact me. Nobody yet has responded to any of my emails or calls. Please count us in to sign a petition for a recount or what is the next step, hopefully all those messy ballots were not already tossed.*

*Sincerely,  
Andrena Schermerhorn*

**Subject:** FRAUD!

This is to advise you of definite fraud in this election - the fraud being Donald Trump, his Republican enablers and their total lies regarding outcome of this election. Trying to steal the election while accusing the legitimate winner of the same! This is the most shameful, indecent behavior imaginable - irreparably harming our democracy, putting forth total lies and trying to will an alternate false reality into being. Trying to destroy democracy! Putin has to be celebrating! This is like the beginnings of Nazi Germany if anything ever was. Totally and completely shameful. When I look at what is going on with this dangerous charade, and think of my father and other WWII vets (and all vets - those "losers and suckers" - who fought and died for democracy, this is beyond abhorrent. SHAME ON YOU ALL perpetrating this lie, when there is NO evidence of election fraud and that has been echoed by all election officials around the country. Don't know how Republicans can look themselves in the mirror.

D.L. Klumpp
