

Border Patrol encounters in Arizona

The number of migrants from South America, Haiti and Cuba crossing the Southern Arizona border grew in 2021 from the previous year, although the number of people who migrate from Mexico and countries in Central America still account for more than 71% of Border Patrol encounters. The number of individual migrants is lower than the number of encounters due to the use of Title 42 and the high rates of reentry in 2021 and 2020.
