

# Proposed Interstate 11 route

An environmental impact study released July 16 proposes two possible routes for a new Interstate 11 through Tucson. One would use the existing I-10 corridor through downtown; the other would go through Avra Valley. Residents, activists and government agencies have long objected to the Avra Valley route, but it is still under consideration.

## Legend

-  Eastern route through downtown\*
-  Western route through Avra Valley\*
-  Tucson Mountain Park
-  Coronado National Forest
-  Saguaro National Park
-  Tribal land
