

**Pocket Fire**  
**June 21, 2026**  
**293 acres**  
**0% contained**

On Saturday, crews prepped along FS 231 and extended line to the edge of Oak Creek Canyon to strengthen containment to the west and north of the fire. They also put line in to protect the historic East Pocket Lookout. Today crews will take opportunities to employ direct extinguishment tactics where they can be used without undue risk to firefighters. Other firefighters will explore indirect options, such as the reinforcement and consolidation of roads, trails and natural features to establish containment lines around the fire.

**Tuthill Oak**  
**Creek Canyon**  
**closed**

Hoshot crews are scouting suppression options in the Dry Creek area.

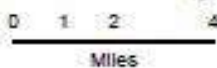

A structure protection group will work in developed areas to identify and fortify houses and other structures against fire.
