THE FUTURE OF ORTHOPEDIC SURGERY HAS ARRIVED

Good Samaritan is the FIRST in our region to revolutionize knee and hip replacement surgeries with the purchase of the Mako Robotic-arm! This robotic arm technology is an innovative tissue-sparing procedure with implants designed to result in a more natural feeling joint. Using a virtual 3D model of the patient's joint, the Mako System allows surgeons to personalize each patient's surgical plan pre-operatively, so there is a clear plan for how the surgeon will position the implant before entering the operating room. During surgery, the surgeon can make any necessary adjustments with the help of the robotic arm to execute the surgical plan with a high level of accuracy and predictability.

- Less Invasive Surgery
- Quicker Recovery
- Less Pain
- Better Outcome

If you have knee or hip pain and are considering joint replacement, call one of our orthopedic surgeons today or visit us online at gshvin.org/mako.
