

Intersection safety

The images below show potential conflict points on a traditional intersection versus a roundabout intersection. On a traditional intersection there are 32 potential conflict points. On a roundabout there are only 8.

Roundabout

Traditional intersection

 Potential vehicle conflict point

Roundabouts have reduced accidents with injuries in Carmel by 78 percent.

Average cost of an accident on a roundabout: \$2,500.

Average cost of an accident at a traditional intersection: \$10,500.

Roundabouts cost on average \$150,000 less than traditional signalized intersections.
