Williston Community Library hosts Easter Eggs-travaganza at Davidson Park

BY MITCH MELBERG Editor@WillistonHerald.com

Thousands of eggs filled Davidson Park for the Community Egg Hunt bringing scores of children to take part in the Spring's first major hunt. Children ran through the park, brightly colored eggs to exchange for prize bags, while taking time to visit with the Easter Bunny and check out some of the specialty equipment on display from the Williston Fire and Police Departments. As a special treat, visitors were able to check out a medical helicopter that stopped by the library to share the good news with the community and review the basics for their own safety. Police and Fire services were on hand to interact with children and ensure everyone had a fun and safe hunt.

“Everyone had such a good time last year, and Arikara Nation, 3 3 from 9 a.m. to noon, there are “virtually no kids there. The area is very quiet. We insist on a one-on-one consultation before any action is taken that would adversely im- pact the market value of our oil and gas resources, which are held in trust on our behalf by the United States,” Fox wrote. “At a minimum, our trustee owes the MHA Nation meaningful consultation that is spe- cific and pre-decisional.” The letter is dated March 21 and was sent to Lt. General Scott A. Spellmon, commanding general of the U.S. Army Corps of Engineers.

The letter comes as the Biden admin- istration requested a delay to familiarize themselves with the case.

The state crossed a milestone for COVID-19 vaccina- tions, with 214,193 doses administered. There have been 151,362 Moderna vaccine doses and 50,433 doses of the Pfizer-BioNTech John- son vaccine. As of Tuesday, March 30, more than 151,362 Dakotans — 15,162 more than the target population — are up to date on the Moderna vaccine. That includes people who have gath- ered the single shot vaccine from the Johnson- son vaccine, as well as those who have gotten both shots of the Moderna and John- son vaccine.

For 22,674 peo- ple, or 40% of the state, that is at least one dose.

The Pfizer vaccine is the most previa, with 214,193 doses administered. There have been 150,415 Moderna vaccine doses administered and 50,433 doses of the Pfizer-BioNTech John- son vaccine.
