[X4] ID PREFIX TAG SUMMARY STATEMENT OF DEFICIENCIES (Each deficiency must be preceded by full regulatory or LSC identifying information) Provide appropriate treatment and care according to orders, resident's preferences and goals. **NOTE- TERMS IN BRACKETS HAVE BEEN EDITED TO PROTECT CONFIDENTIALITY** Based on record review and interview, the facility failed to have a system in place to ensure residents who have diagnostic testing scheduled attend the scheduled appointment as ordered, and, if a scheduled appointment is missed/cancelled, the physician who requested the testing is updated and alternate scheduling occurs to ensure residents receive the care and treatment required in accordance with professional standards of practice. This affected 2 of 5 sampled residents (R2 and R4). R2 had a CT (computed tomography) scan scheduled for [DATE] following months of abdominal pain and to rule out the potential of kidney stones which the nurse practioner felt could be the contributing cause of R2's pain. R2 did not attend this appointment. The facility did not reschedule the appointment or inform the ordering physician that the resident had missed the appointment. This delayed diagnosis [MEDICAL RECORD OR PHYSICIAN ORDER]. On [DATE], R2 had a severe change in condition where she ended up going to the ER (emergency room) and then directly to the OR (perating Room) to have a [CONDITION(S)] stent due to finding a large kidney stone. R2 was diagnosed with urosepsis. R2 spent 7 days in the ICU (Intensive Care Unit) and expired as a result. The facility's failure to have a system in place to ensure residents attend scheduled appointments for diagnostic testing or a system to reschedule a missed appointment to ensure resident receives the necessary care and treatment required created a finding of immediate jeopardy which began on [DATE]. Surveyor notified MNHA (Nursing Home Administrator) of the immediate jeopardy was premoved on [DATE], however, the deficient practice continues at a severity/scope of 0 (Isolated/Pot			110 Belmont Rd

F 0684 Level of Harm - Immediate jeopardy to resident health or safety	On [DATE] at 14:42 (2:42 PM) Update on res, per . ICU RN that res is still in ICU but VS were stabilized, still receiving IV (intravenous) ATB (antibiotics) for urosepsis. RN states res kidney function levels remain very poor and no improvement seen in levels each day. Under discussions by MD's (Medical Doctors) whether or not to start res on a temp (temporary) [CONDITION(S)] until kidney function levels improve. RN states to expect res to be in hospital this week yet.			
Residents Affected - Few	On [DATE] at 1:56 PM, Surveyor interviewed LPN F (Licensed Practical Nurse). Surveyor asked LPN F what the process was when a resident received an order for [MEDICAL RECORD OR PHYSICIAN ORDER] . LPN F went on to explain and made it clear that the following is her system when she receives these type of orders, not the Facility's; LPN F said she puts a red dot next to the information on the planner when she has filled out the transportation slip that goes to DMR C (Director of Medical Records), then she writes noted, her name, and date. Surveyor asked LPN F why she gives the transportation slip to DMR C, LPN F said because she sets up the transportation for the appointments.			
	On [DATE] at 2:25 PM, Surveyor interviewed LPN F. Surveyor asked LPN F if there were transportation issues with R2's [DATE] appointment. LPN F stated she had transportation set up, I don't know what happened. Surveyor asked LPN F if R2's appointment was canceled from the Clinic site would that be written somewhere in the planner, LPN F said no, possibly in a Nurse's Note. It is important to note that there are no Nurse's Notes in R2's medical record about receiving an order for [MEDICAL RECORD OR PHYSICIAN ORDER].			
	On [DATE] at 2:53 PM, Surveyor interviewed NP G. Surveyor asked NP G to explain what transpired from her visit with R2 on [DATE] to her passing away; NP G stated she spoke to R2's Guardian on [DATE] and R2's Guardian stated if R2 was willing to complete the scan then she would agree; if R2 did not want to complete the scan then they would need to discuss a different course of action. NP G said she then faxed the Facility the order for the CT scan on [DATE]; NP G said she was told the appointment had been scheduled when she was in the facility to see her patients. NP G explained between her visit with R2 in September and the day R2 went to ER, the Facility had contacted on call Providers twice due to R2's pain, one of which was abdominal and the other that was not. NP G stated she and R2 had been trying one intervention at a time in an attempt to pin-point the cause of the pain. Surveyor asked NP G if it were possible that the Radiology Clinic canceled R2's appointment, NP G verified in computer system that R2's GI appointment was actually scheduled for [DATE] and R2 was documented as no show; and R2's CT scan appointment was scheduled for [DATE] and R2 was documented as no show, and R2's CT scan for R2 but no one answered the phone. Surveyor asked NP G if she thought that R2 would have agreed to place the stent if the CT scan had shown the stone sooner, NP G said yes, R2 would have been agreeable to stent placement as she has had them in the past and they had helped. Surveyor asked NP G from the time R2 was sent to the OR for the stent placement, what happened; NP G explained R2 was intubated (breathing tube placed) during stent placement surgery and was never extubated (breathing tube removal), her blood pressure dropped putting her in septic shock and requiring [MEDICATION(S)] and [MEDICATION(S)] (medications to attempt to stabilize blood pressure); she spent 7 days in the ICU and then passed away. Hospital documentation supports NP G's interview regarding R2's hospital course.
