

SAFETY UPDATE: WILDFIRE SEASON IS HERE

At Navopache Electric Cooperative, your safety is our top priority. Effective immediately, NEC is taking precautions to help protect our beautiful communities from fire risk.

WHAT THIS MEANS FOR YOU:

We have adjusted all substation transmission breakers to “non-reclose”. In this safety setting, power lines that experience a fault (such as a tree branch contact) will de-energize instantly and will NOT automatically re-energize.

RESTORATION TIMES:

Because of these settings, outages may last longer than usual. To ensure public safety, our crews are now required to physically patrol and inspect the full length of the affected area before power lines can be re-energized. We appreciate your patience as we prioritize the safety of our communities.

We know power interruptions are frustrating, and we thank you for your understanding as we work to prevent wildfires in our area. Stay safe, everyone!
