

Opportunities by the Numbers

The Black Ridge Renewable Energy Project is a proposed 800 MW wind and solar facility representing a \$1.6 billion investment in Apache County. Black Ridge will create new jobs and will provide an economic stimulus across the local economy while providing affordable, reliable electricity to the Arizona grid.

Located on Private and State Land

- More than 50% of generation on private land, supporting family ranches.
- The project also has a right-of-way with the Arizona State Lands Department, which dedicates revenue for Arizona's public schools through the State Land Trust.

Creating Jobs and Opportunities

- About 20 new operations jobs with \$1.3 million in new salaries annually.
- An estimated 500 construction jobs.
- \$124 million of economic output during construction, benefiting local businesses.

New Revenue for Local Services

- More than \$65 million in property tax revenue.
- An additional \$6 million in direct contributions to serve local residents.
