Did you know?
Household detergents like dish or laundry soap should never be used to wash your car. These and other household cleaners can strip your vehicle's protective wax coating and dull the finish.

**April is
National
Car Care Month:
Spring into Action**

Spring is a season of rebirth for many people, who welcome the warm weather with open arms, especially those who just endured a harsh winter. Spending time outdoors when the weather warms up is a popular pastime for many people each spring.

Road trips taken by college kids or high schoolers hitting the road for spring break or professionals and parents packing up the car for a weekend getaway have become synonymous with spring.

Get the vehicle a tune-up. A tune-up, including an oil change, should

be part of your pre-trip planning. Make sure winter hasn't caused any damage to the vehicle's body and ask your mechanic to perform a thorough inspection of the vehicle's suspension and brakes. If any problems arise, address them before embarking on your road trip.
