# KEEP YOUR KIDS VAPE FREE

## VAPING & SMOKING

Smoking and vapor-producing devices to inhale nicotine or THC are dangerous.

**Know the Risks**  
Vape products and cigarettes may be legal for adults, but they are not safe. There is nicotine in both cigarettes and "vape juice" (liquid used to create vapor). Sometimes, THC in marijuana is used in vaping devices as well. Both can harm adolescent brain development. Nicotine is highly addictive and can prime young brains for addiction to other drugs, such as opioids or meth. But nicotine isn't the only problem. Even vaping without nicotine or THC is risky, and cigarettes have a long history of proven health hazards. Both smoke and vapor can contain harmful substances like lead, heavy metals, volatile organic compounds and cancer-causing agents that stay in the lungs.

**Know the Facts**

- Current use of tobacco and vape products in the Region 4 area is above the Nebraska average. In this region, more than 17% of 12th graders smoke cigarettes regularly and nearly 34% vape regularly.
- Of 8th grade students, 11% report a parent or other adult relative is buying or giving them the cigarettes or vape products they use. Another 20% admit they take them from home without permission.
- Many young people perceive vaping as healthier than smoking and with minimal health hazards, but studies show otherwise. Vaping is on the increase as a result.
- Vaping devices are called vapes, e-cigarettes, vape pipes, mods, vape pens, e-hookahs and by many brand names.
- These devices can look like everyday items, such as USB drives, pens or small rectangular boxes.
- Young people are especially attracted to flavored liquids which release a sweet or minty scent.

**Focus on Prevention**  
The most important way you can help young people avoid the dangers of smoking and vaping is to address them directly. Make sure they understand the very real dangers to their health—avoid a lecture but allow for discussions. Encourage questions without judgment, and let them know that if they are smoking or vaping, they have supportive adults to help them quit. It's all about being healthy.

This project was developed with funds from the Substance Abuse Prevention Treatment Block Grant (CFDA #93.959) from the Substance Abuse Mental Health Services Administration through the Nebraska Department of Health and Human Services Division of Behavioral Health and Healthy Communities Initiative.
