Getting it Right!

Like cutting your own hair, it's nearly impossible to measure your own pupil distance.

Online ordering is handy, but not for your glasses. Researchers of the AOA found:

- Over 21% of all lenses are not made as ordered.
- 9 out of 10 websites studies did not collect all necessary information required to dispense accurate spectacles.
- 44% failed at least one optical impact test.

We care for your eye care, eye wear and most of all—you!
