

RCPP SUBAWARD PUBLIC ANNOUNCEMENT

The Wyoming Water Development Commission (Commission) was awarded a Regional Conservation Partnership Program (RCPP) grant from the U.S. Department of Agriculture (USDA) Natural Resources Conservation Service (NRCS) to provide drought resiliency through enhanced water management in the Upper Colorado River Basin in Wyoming, which includes the Green River and Little Snake River watersheds. The Wyoming Water Development Office (Office) has authority to administer the RCPP grant #3207 on behalf of the Commission. The Office, NRCS, and contributing partners will assist producers and Water Management Entities (WMEs) through the RCPP process with their NRCS Conservation Practices, such as installing sprinklers, converting open canals to pipe, improving diversions, lining conveyances, bank stabilization, etc. WMEs apply directly to the Office for subawards, while producers apply to NRCS for cost-share reimbursement.

The Office is pleased to announce that we are now accepting applications for subawards under the RCPP grant #3207. You can find more details by visiting the website below. Contact the Office Grants Administrator at (307)777-7626 or wdc.GrantsAdministrator@wyo.gov with any questions.
