LIMITED EDITION OFFICIAL RESTRIKE

A Historic Design is Reborn!

Possibly the most iconic coins known in The Netherlands: the Lion Daalers were first minted in 1575 by the Dutch Provinces to foster maritime trade as The Netherlands became a world trading power. Each province had its own unique lion and mint. This is the Lion Dollar from West-Friesland, first brought to America in 1609 by explorer Henry Hudson and then by Dutch settlers as they began moving to what would some day be the United States in 1614. Dutch Daalers were used in the United States until the early 19th-century.

This 17th-century coin directly influenced the newly formed United States monetary system, providing the inspiration of naming our “Dollar” currency unit. This is an official, re-strike of the “Lion Dallar” by the Royal Dutch Mint in 2023 containing 1-ounce of 99.9% pure Silver. This coin is an historic addition to anyone’s prized coin collection. Now, you can secure this piece of world and United States history with the *Dutch Lion Daaler 1 Ounce 99.9% Silver Coin* from The Bradford Exchange Mint.

Minted in 99.9% Solid Silver

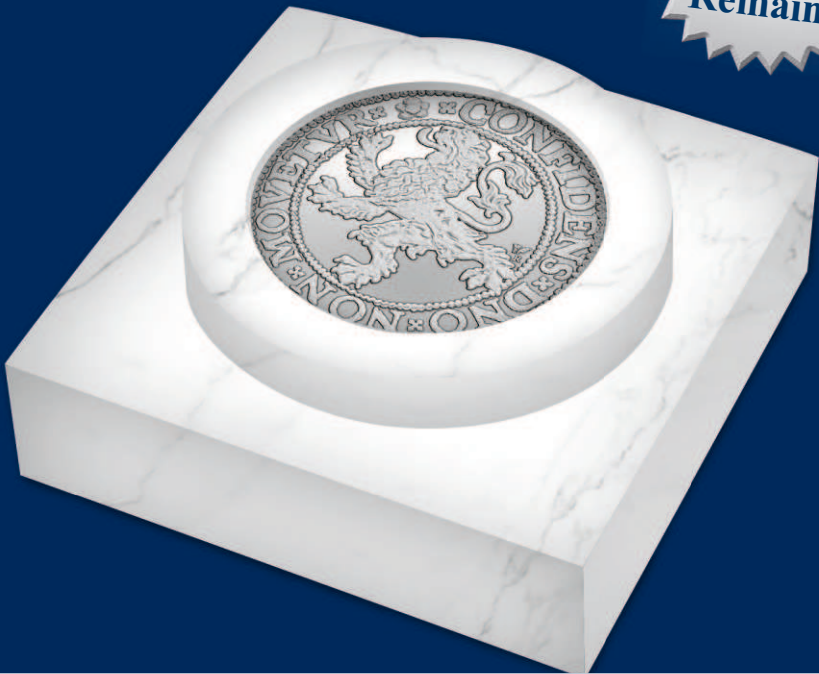

Each coin is expertly minted in a full Troy ounce of 99.9% Silver, ensuring their lasting value as not only heirlooms, but as precious metal treasures. The obverse features an armored knight with a sash, looking over his left shoulder. The left hand on his sword and right hand on shield with the dual lion coat of arms of West-Friesland. The reverse design portrays a rampant heraldic lion, the traditional coat of arms of The Netherlands. Proof-quality coining dies create its mirror-like fields and imagery.

Only 50 Remain of the 800 Mintage Worldwide - Act Now!
